

Existing Site Condition: Section Across the main street

Triggers: Spaces for small business and informal activities

Axo drawing of sweet shop composition and interactions

Top: Sweetshop at the traffic island besides the Dargha

Bottom: NID north side corner - Markets in shading

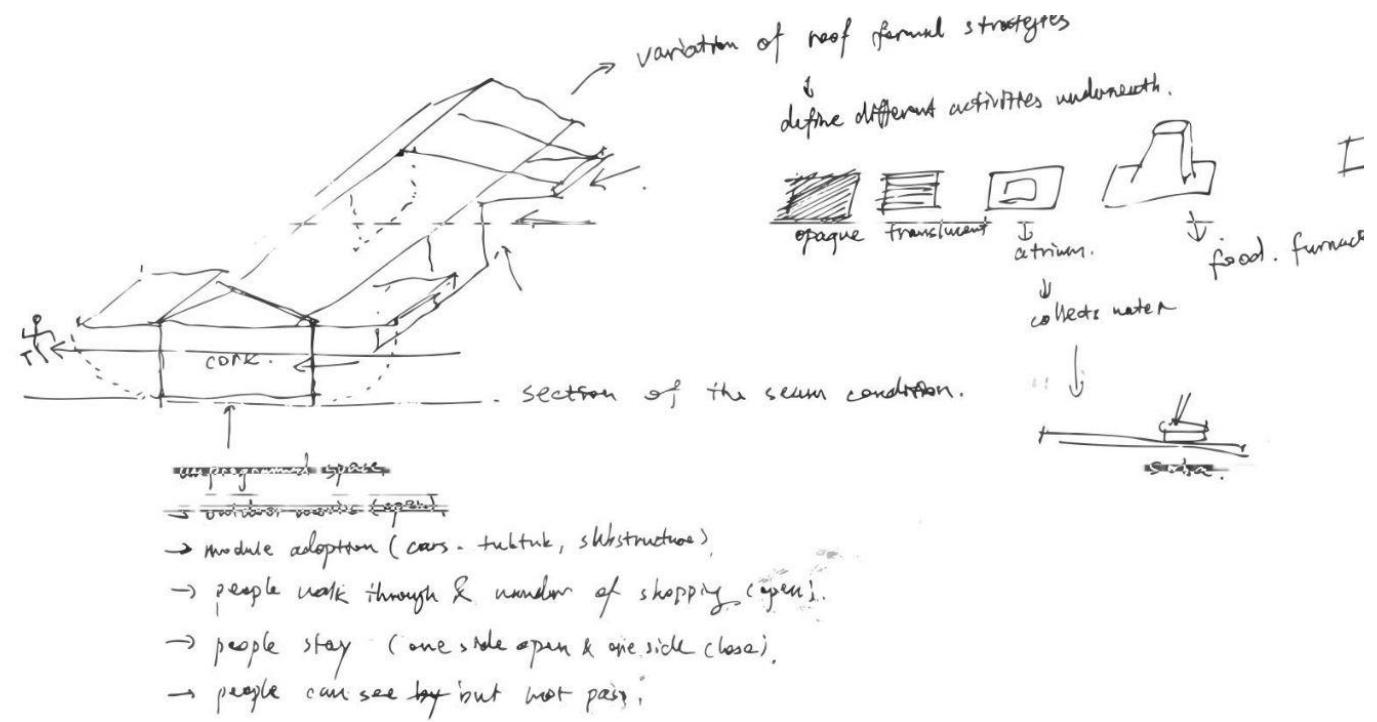

Space in India: Precious resource that serves the population to the fullest

Picture credit to lecture: When Small is Big || Ruturaj Parikh, Matter.

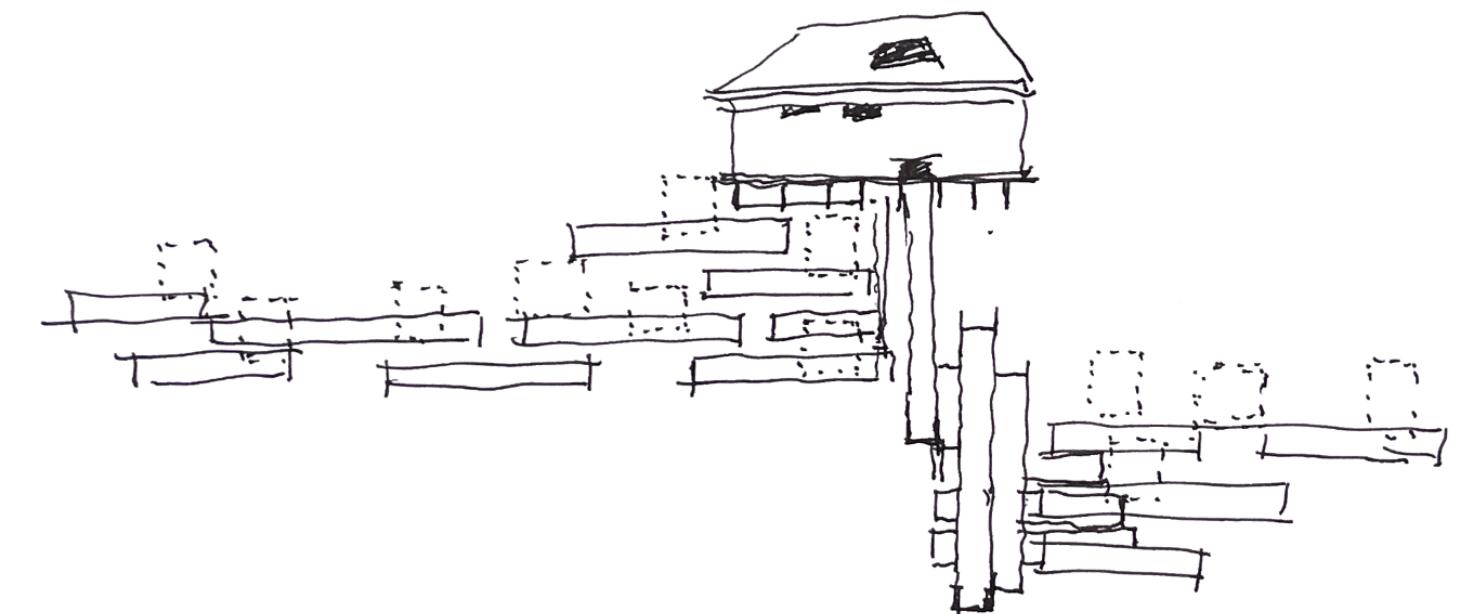

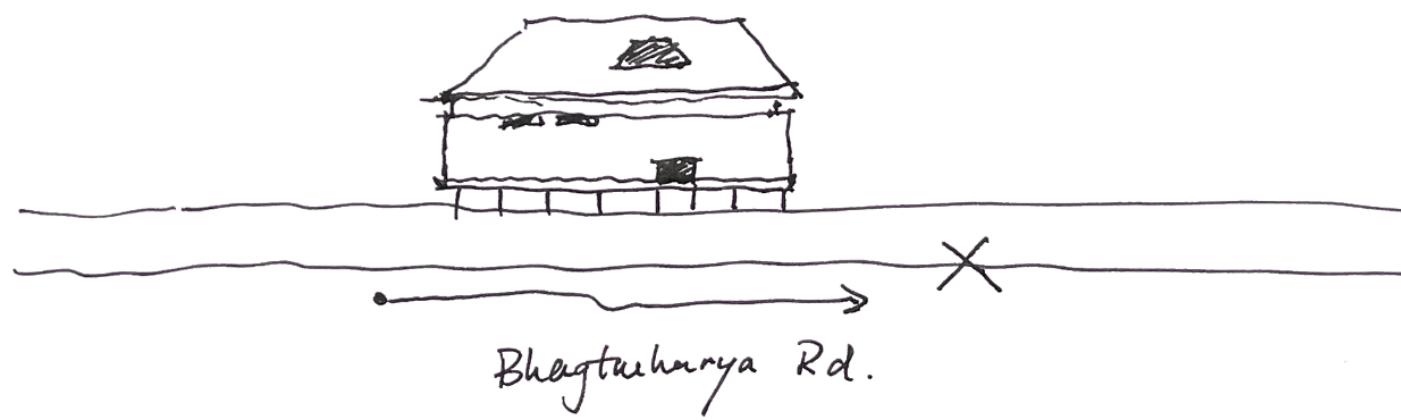

What if scenario:

What if all the seam conditions became volumes that are occupiable?

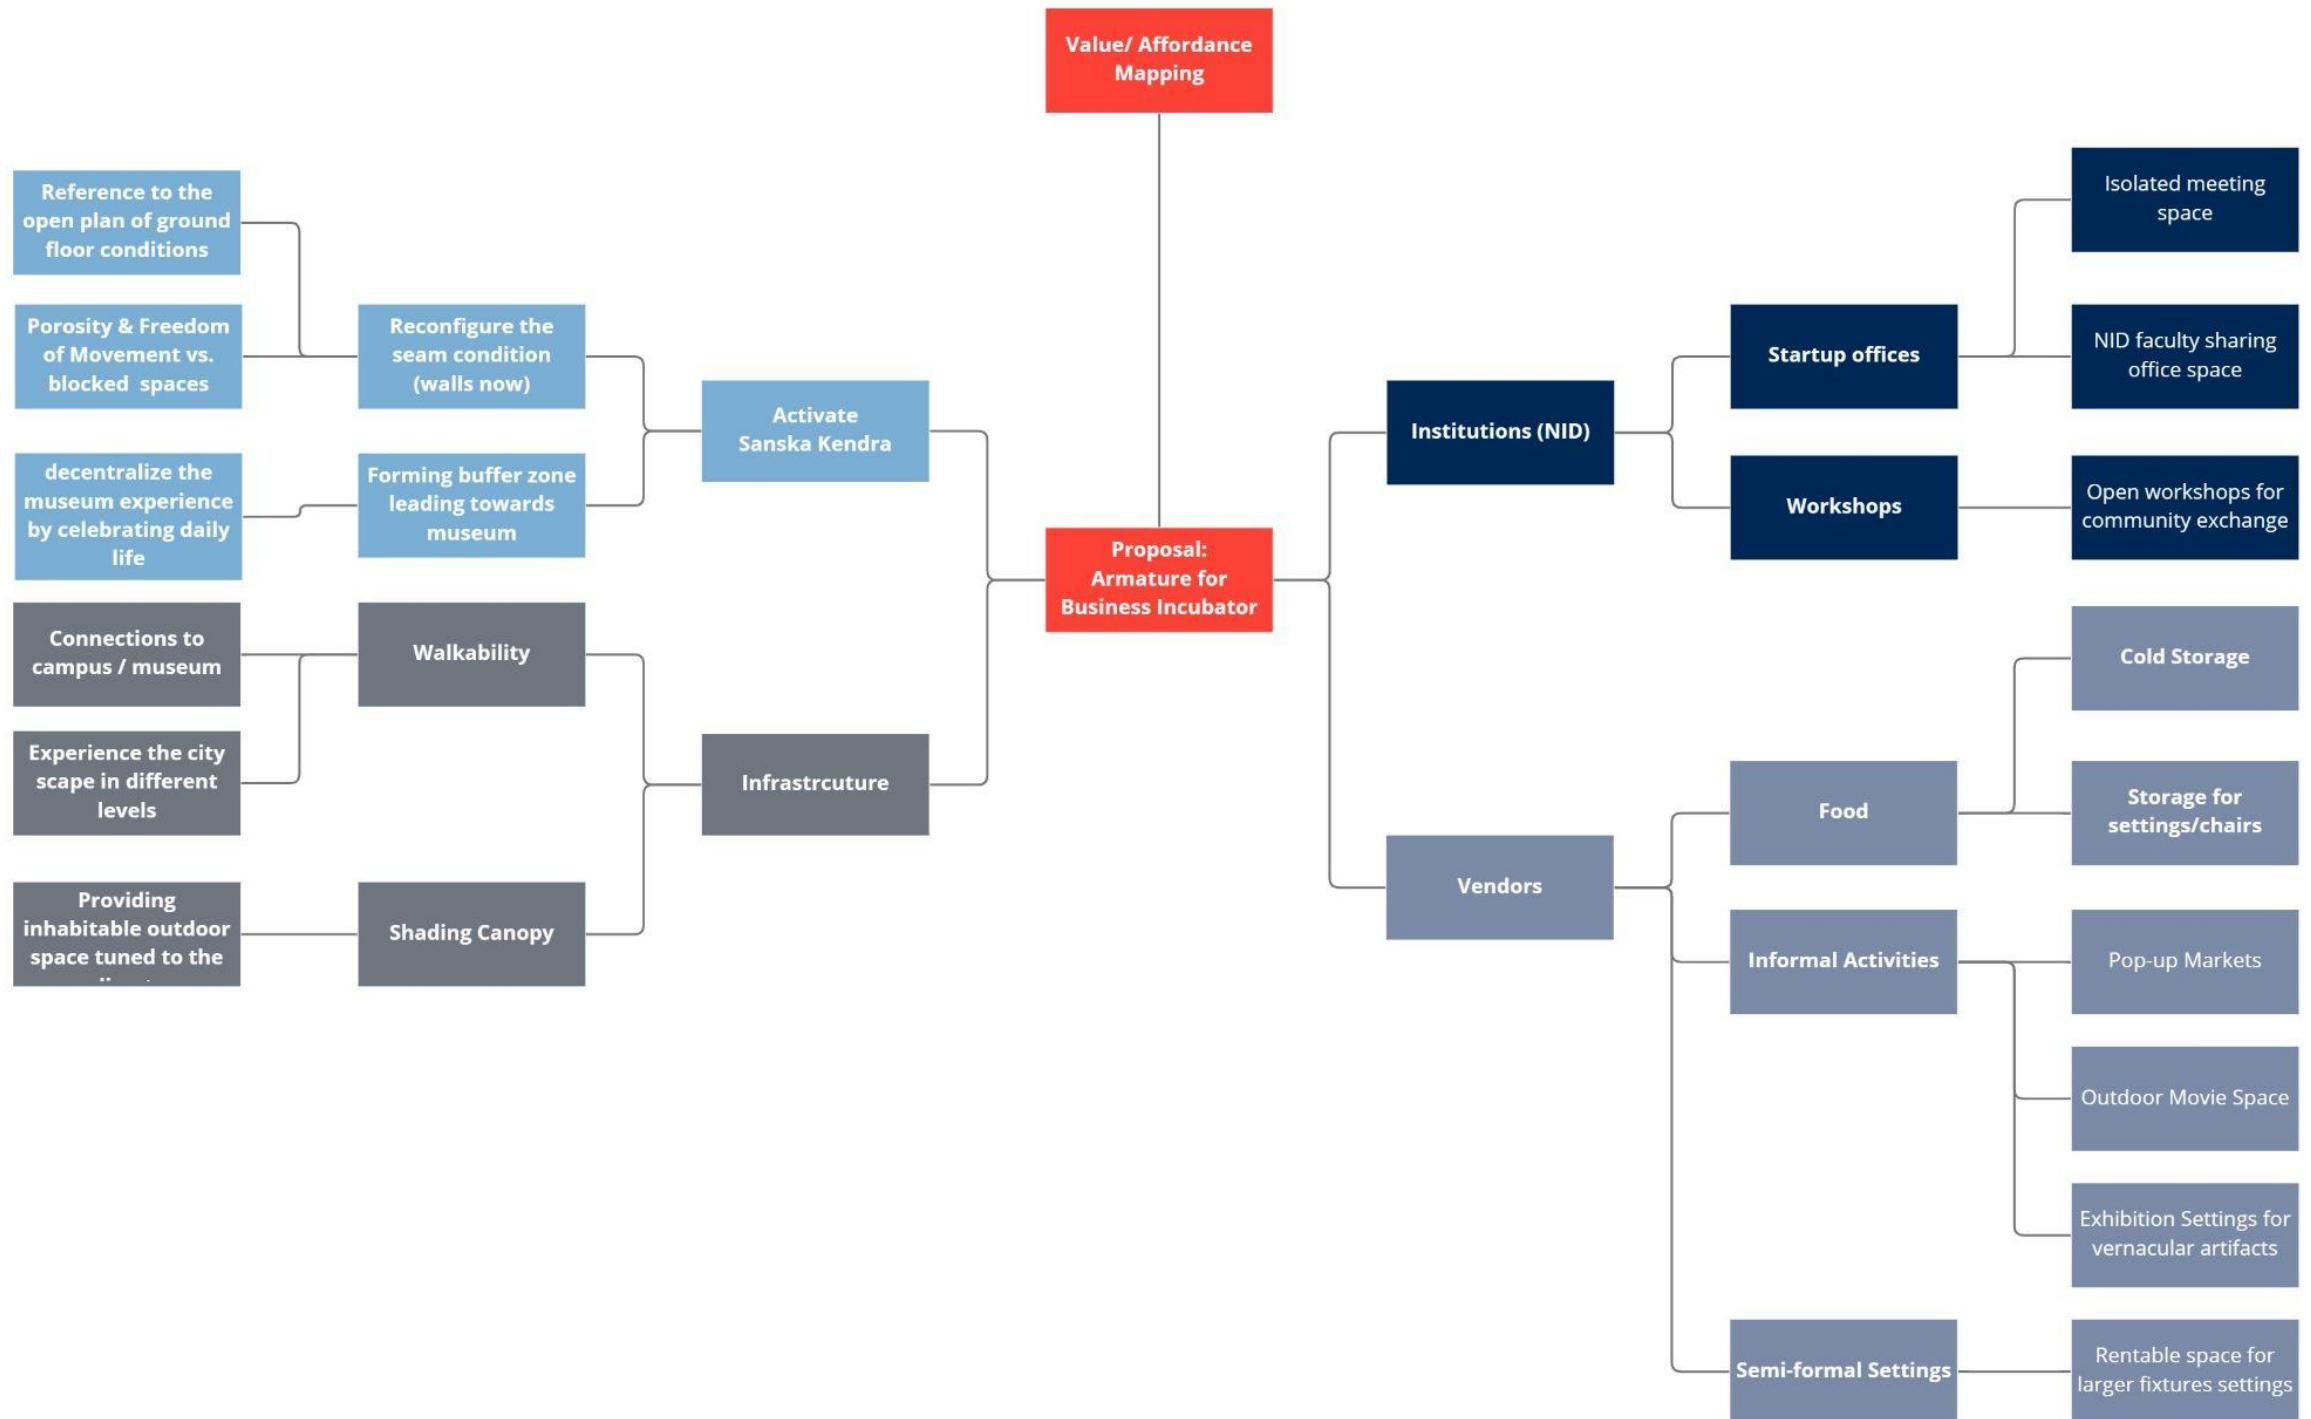

What if scenario:

**What if the vendors can be incorporated
into the site?**

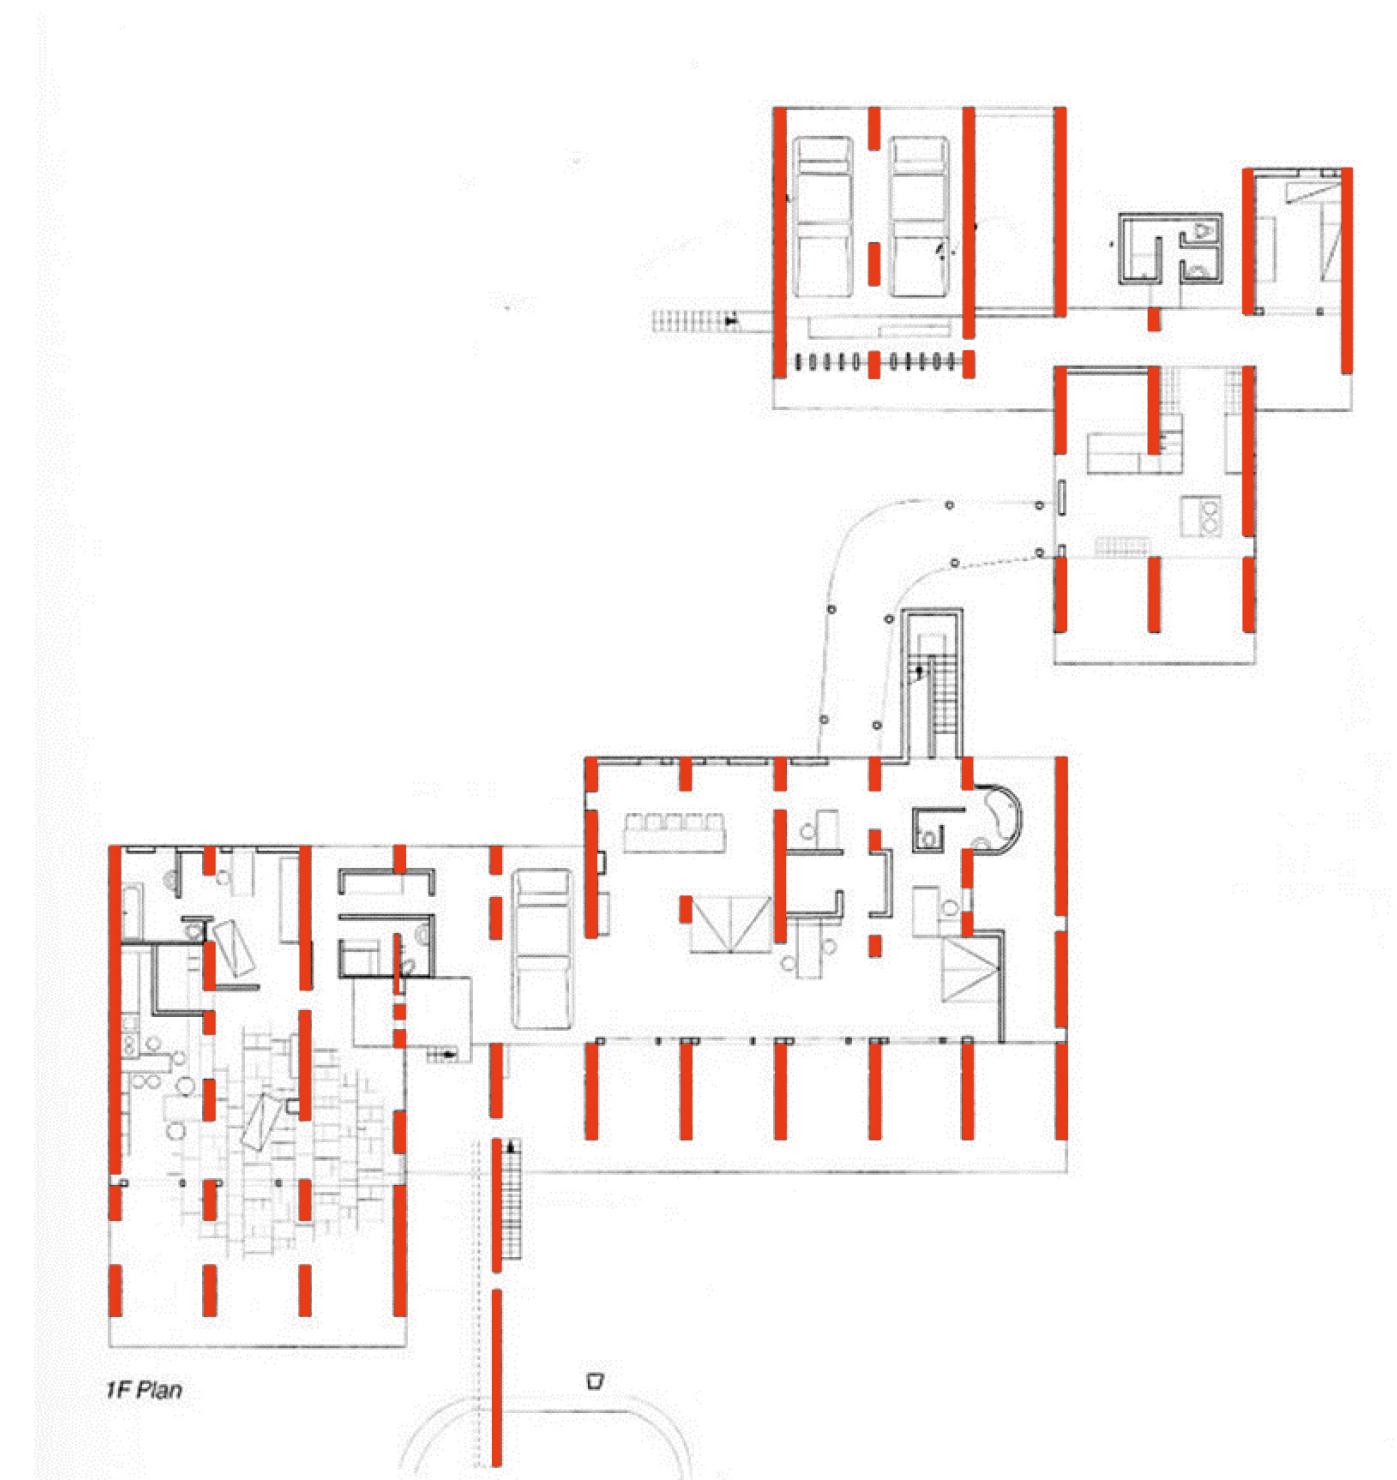

Ecology Mapping of Incubator: Values can be made with the system.

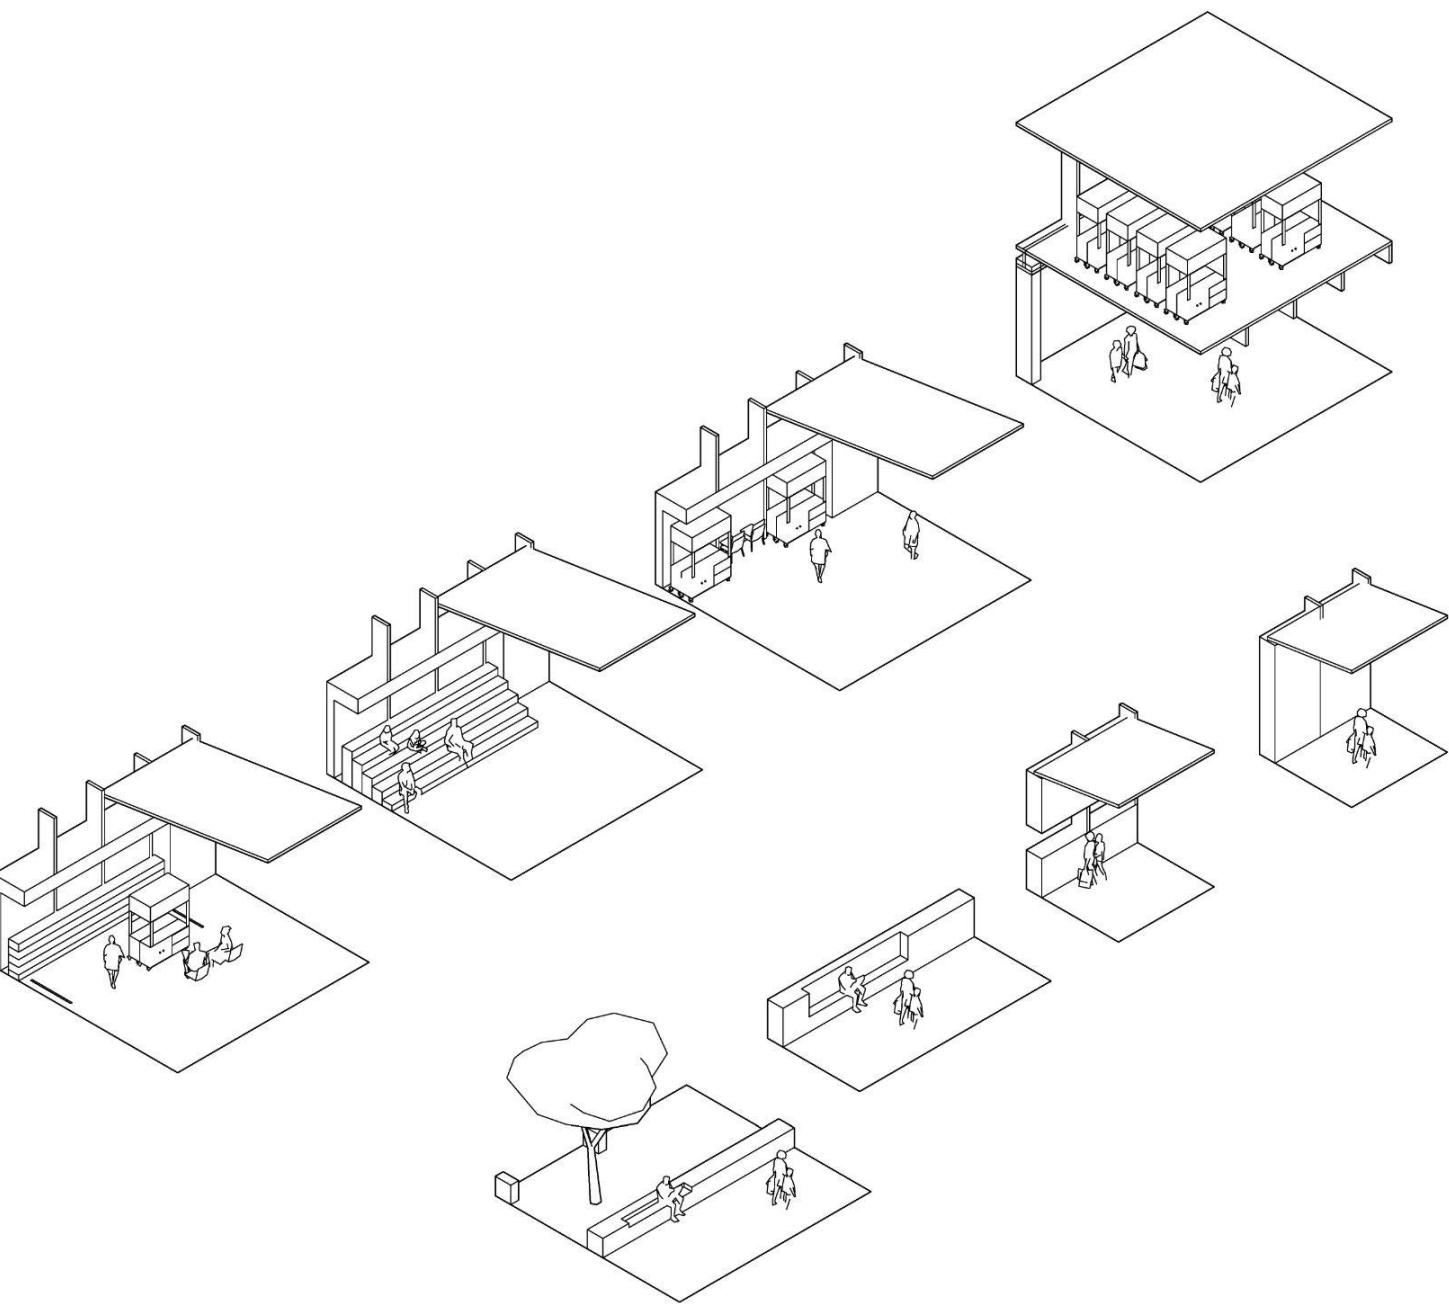

Proposal's value flow with existing institutions and stakeholders.

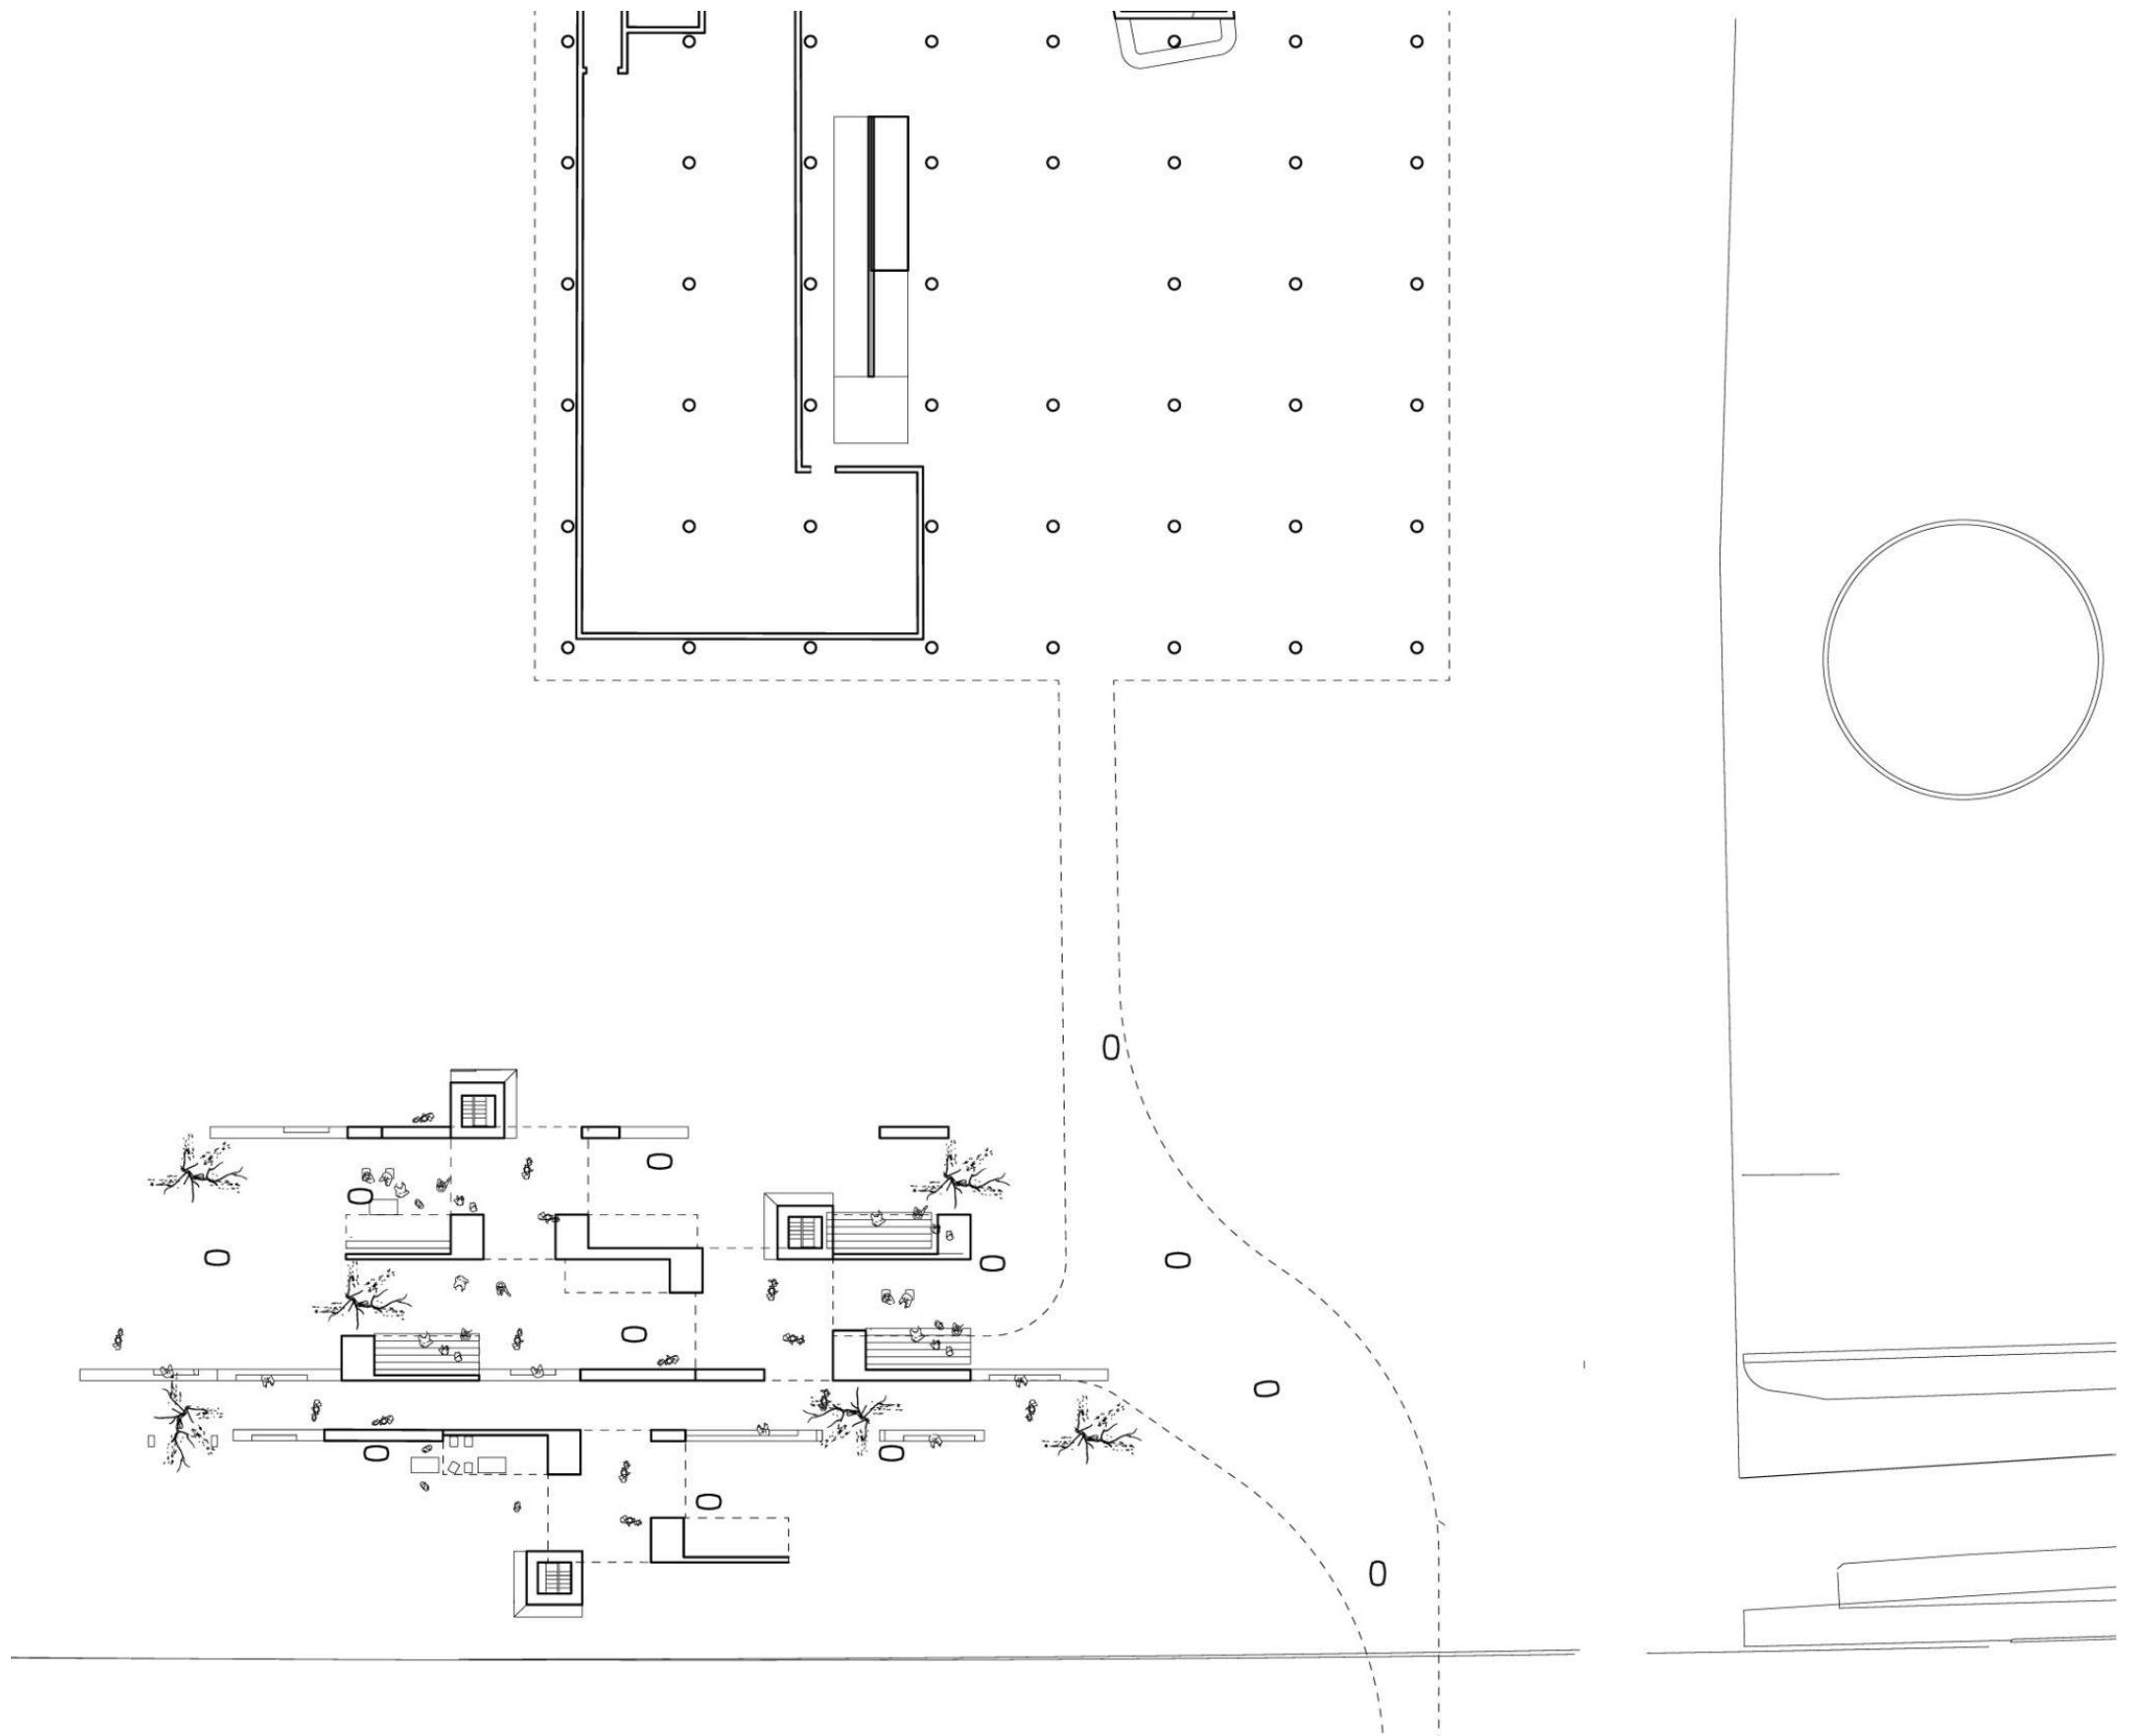

Organizational Principle: Study from Sarabhai House

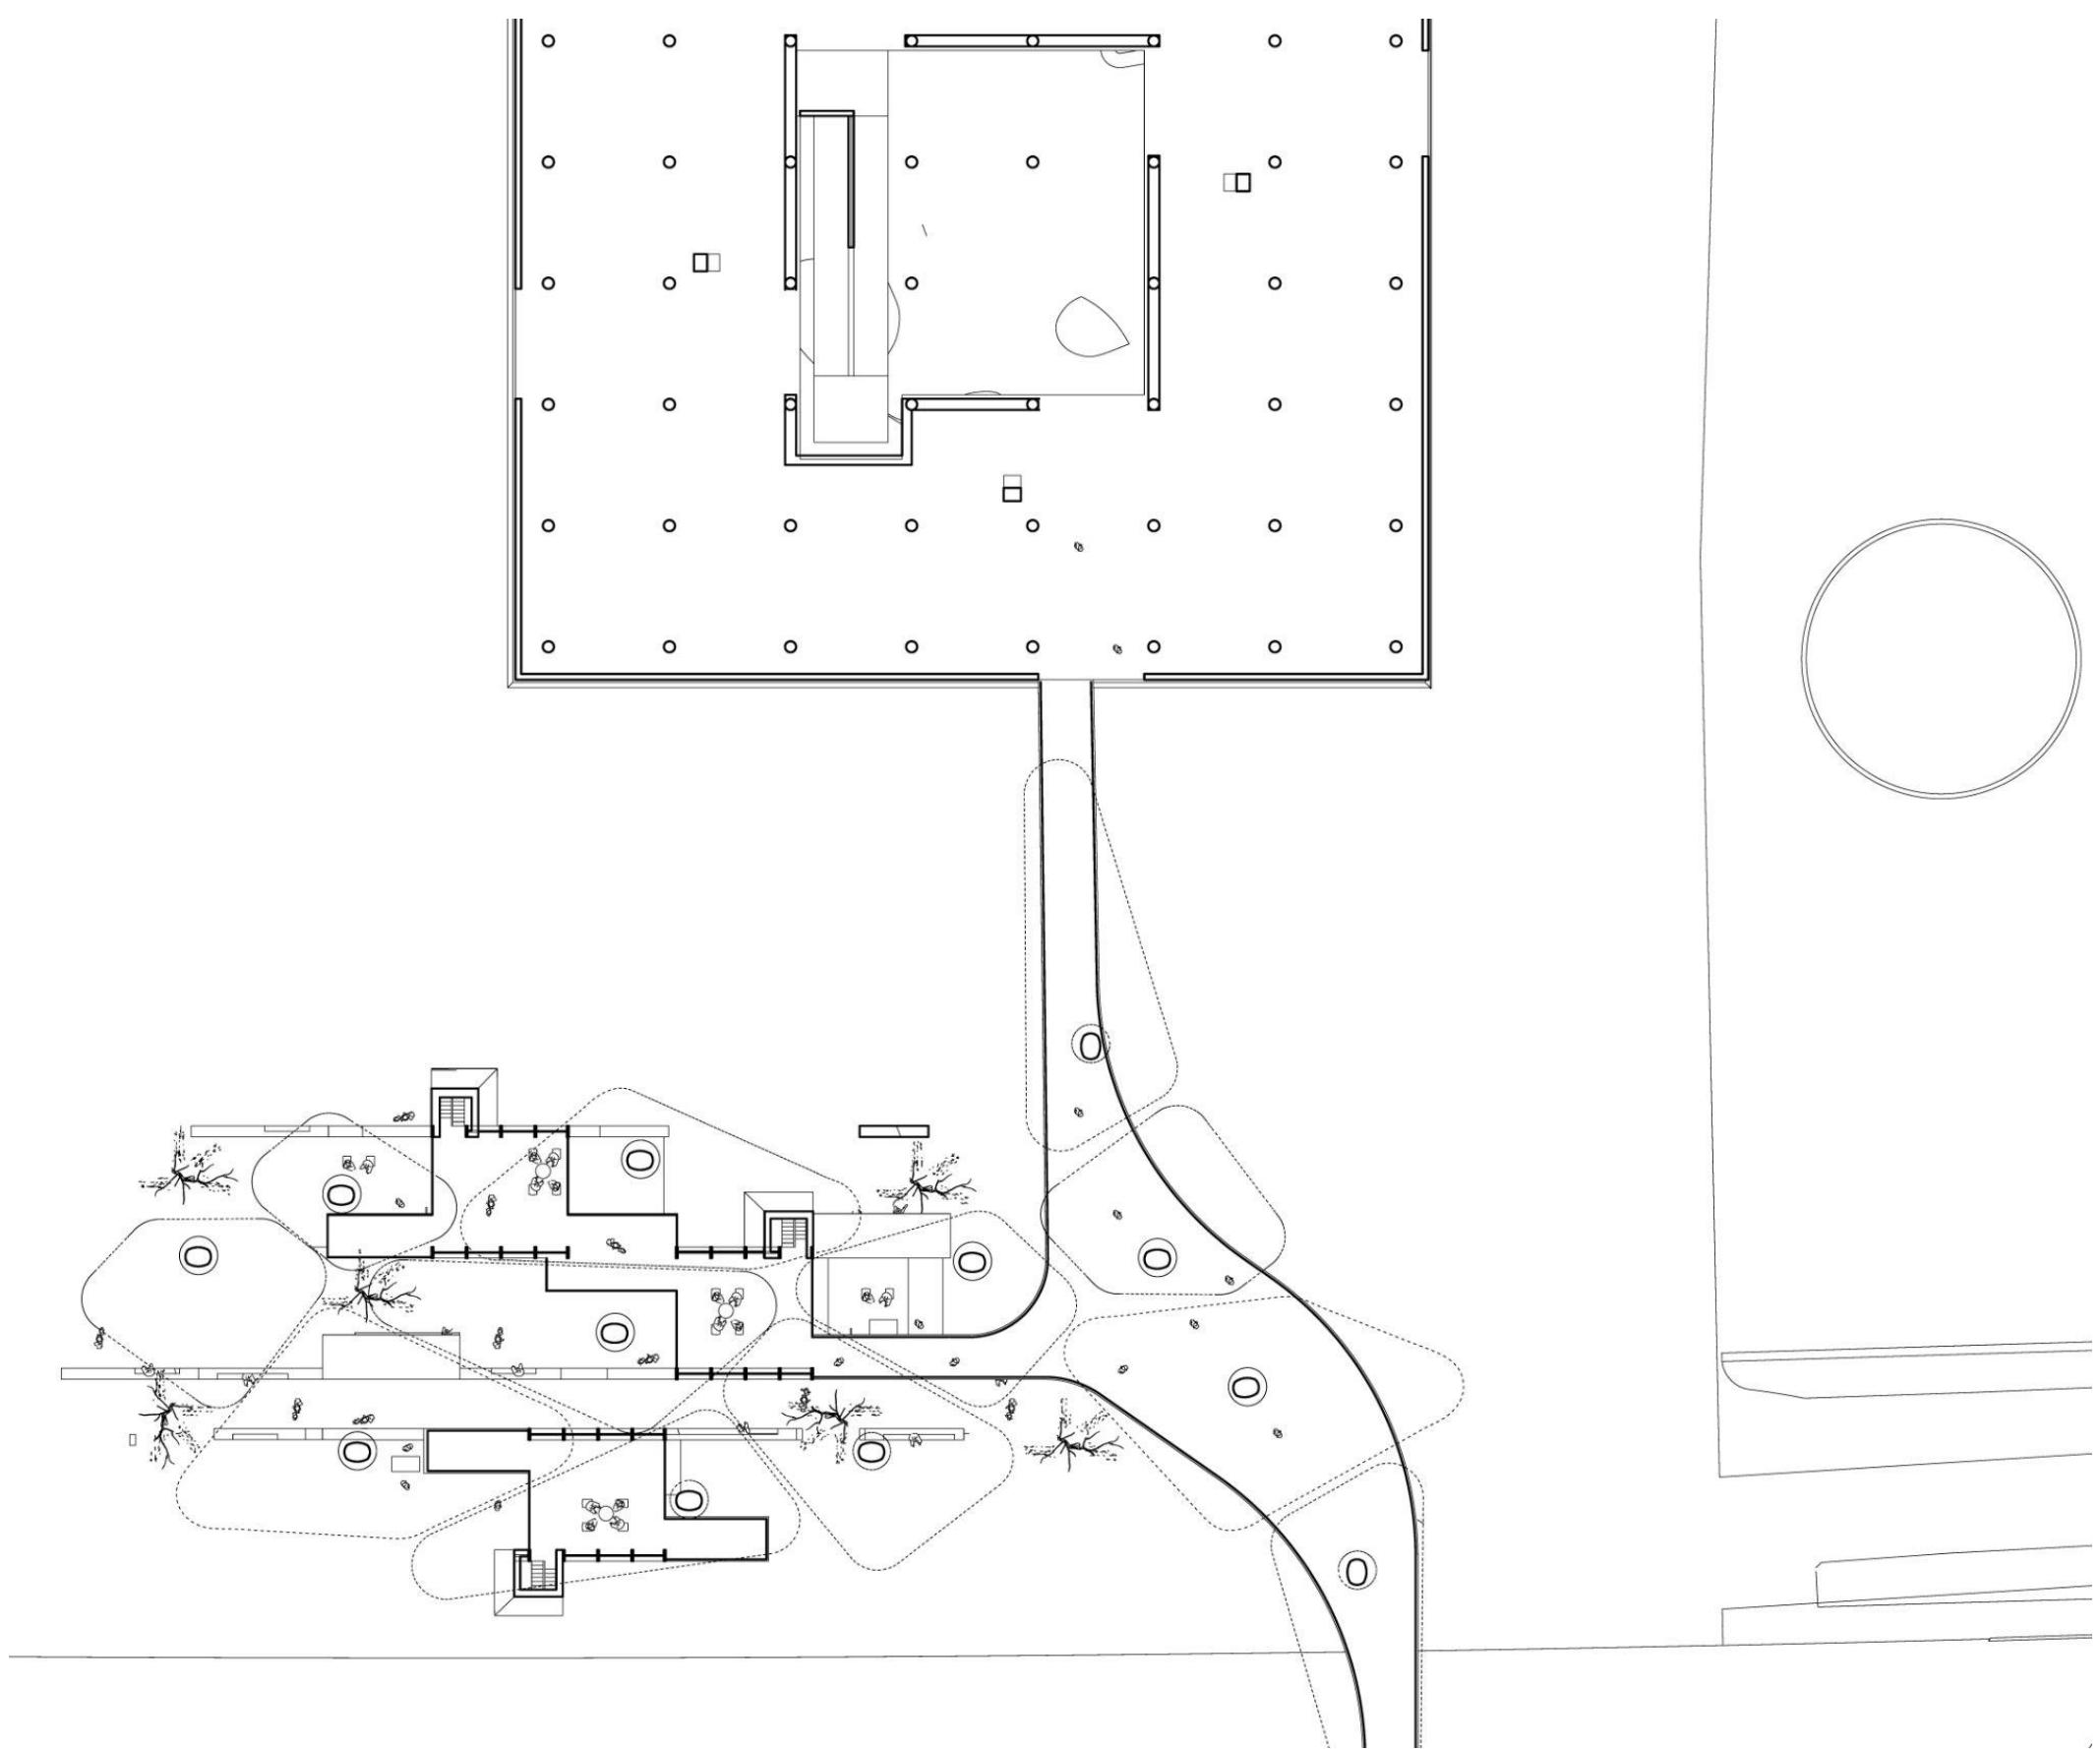

Porosity in the public space that allows free movement

Unit Development: Modules of activities, Chunk plan of loose fit condition

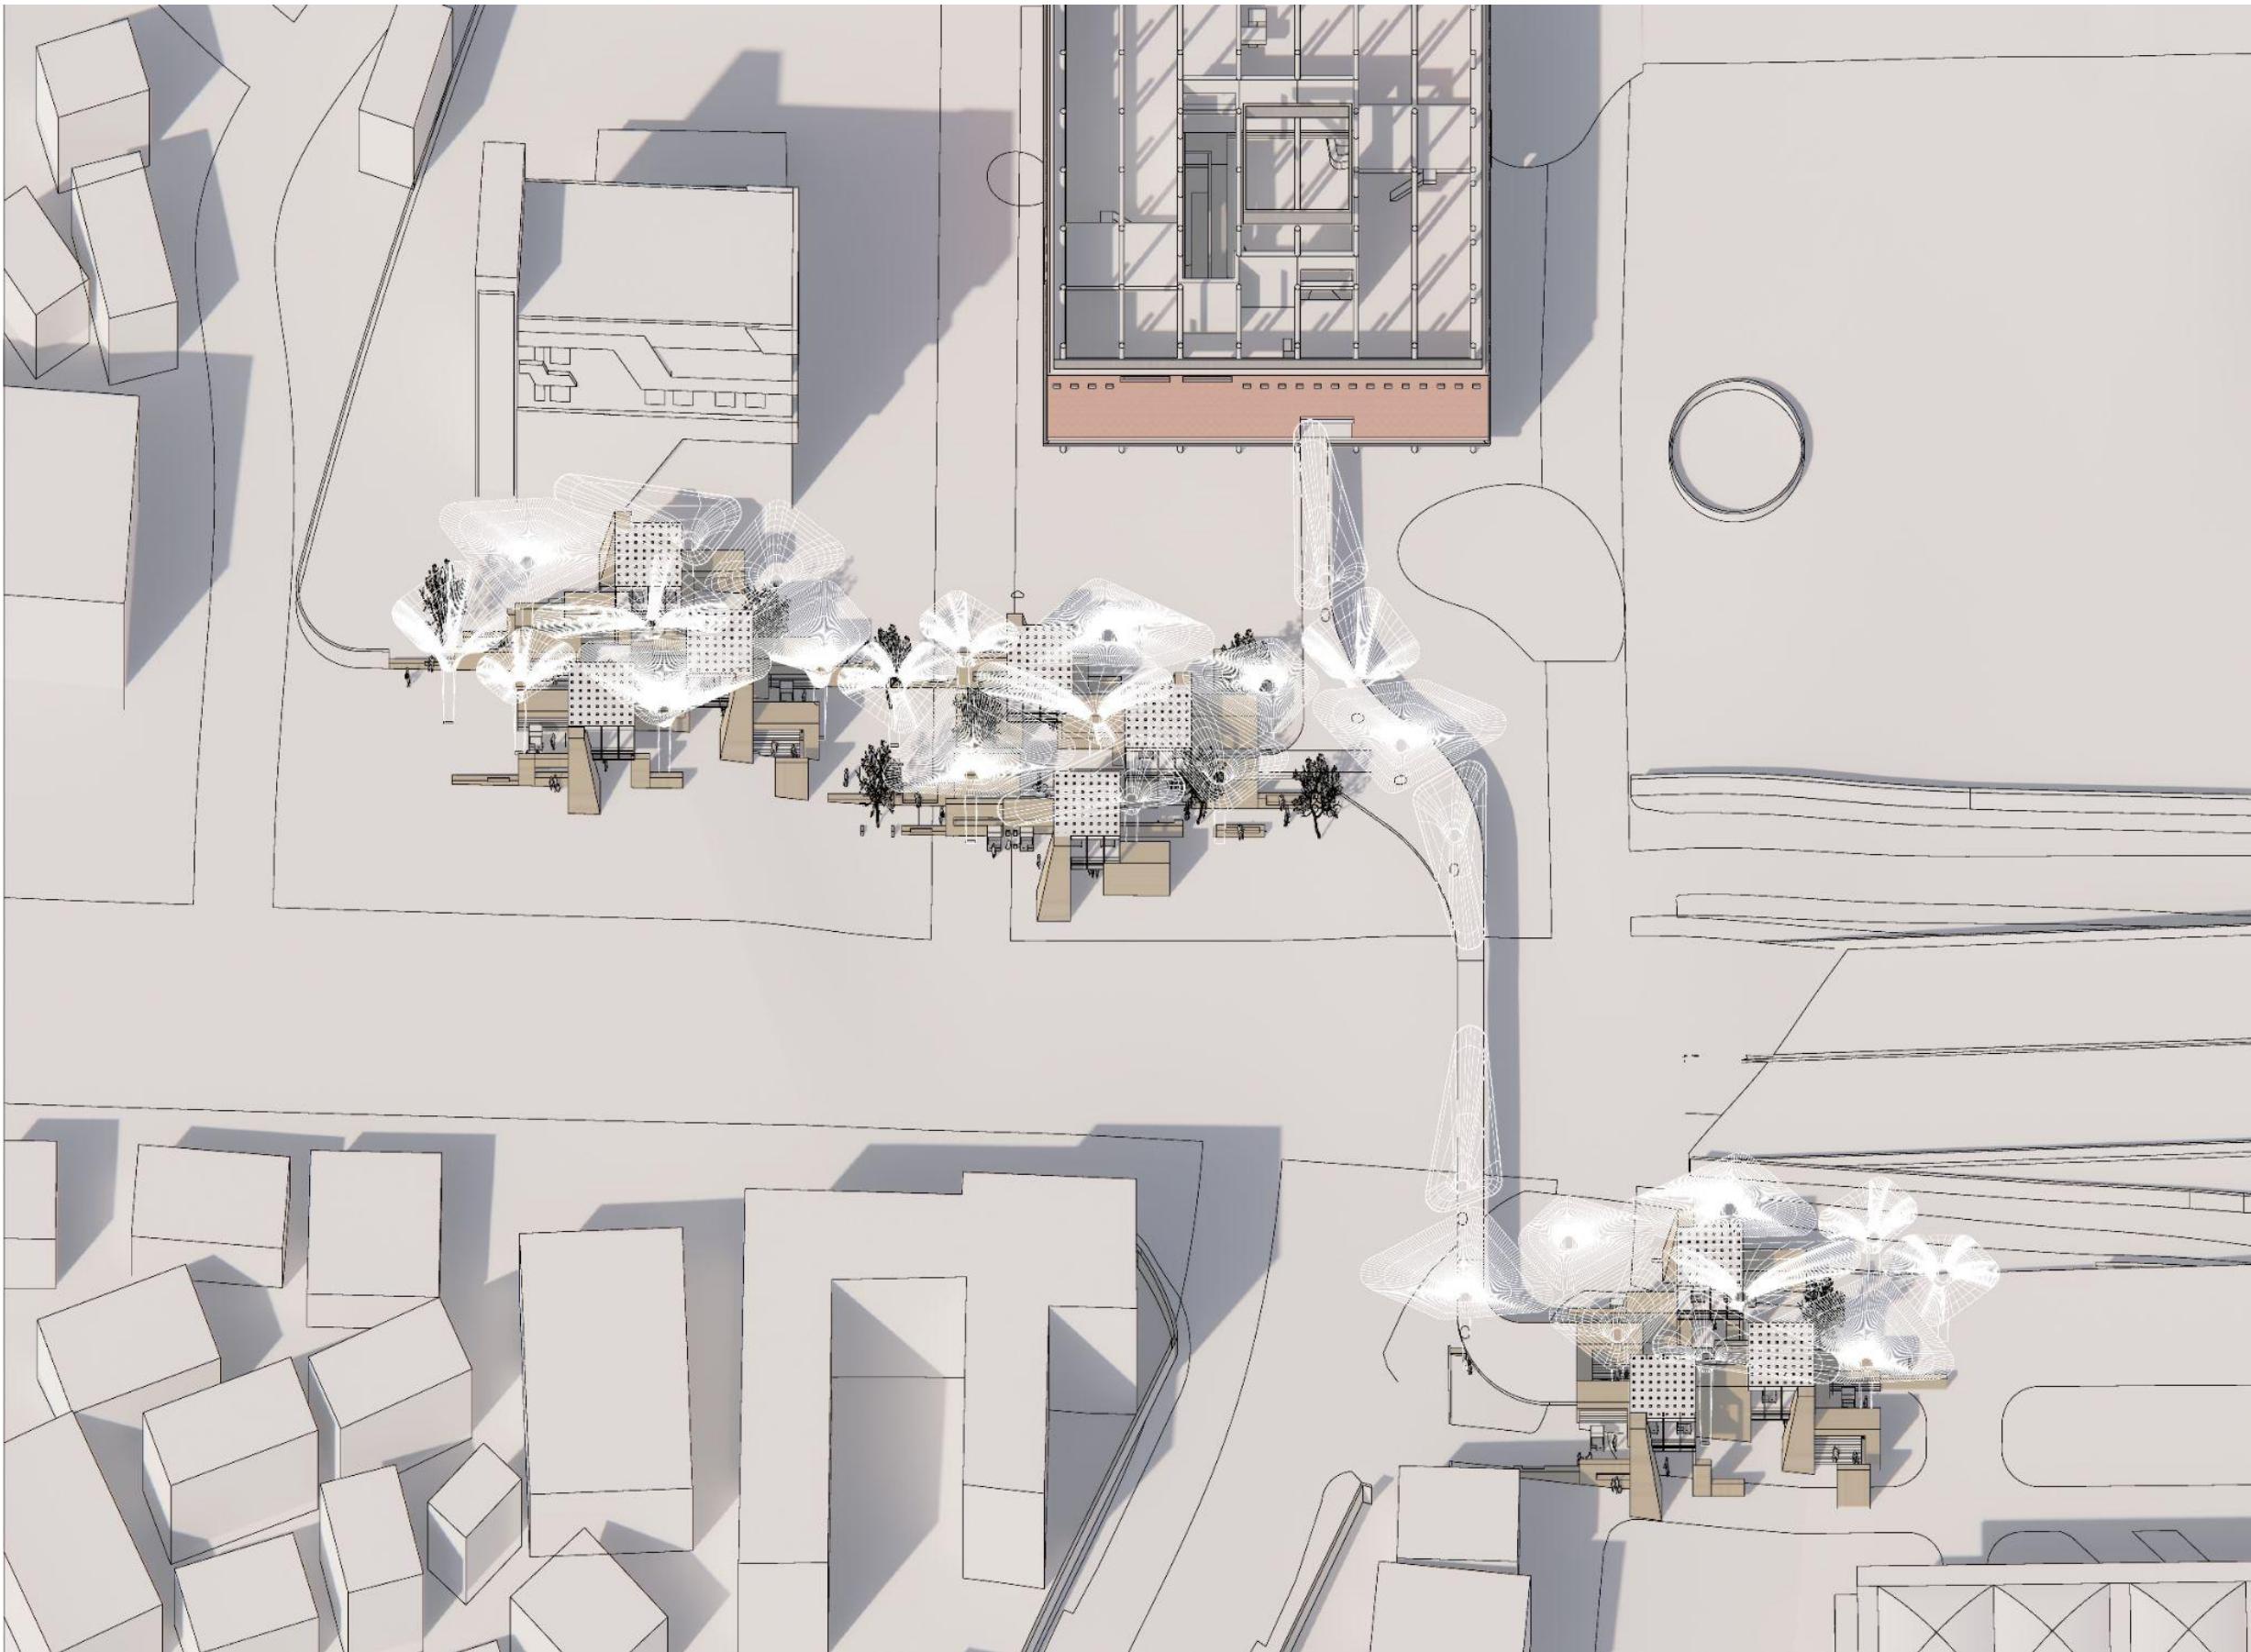

Unit Development: Chunk plan of loose fit condition

Unit Development: Chunk plan of loose fit condition

Roof Plan connecting the sanskar kendra and NID, larger scheme

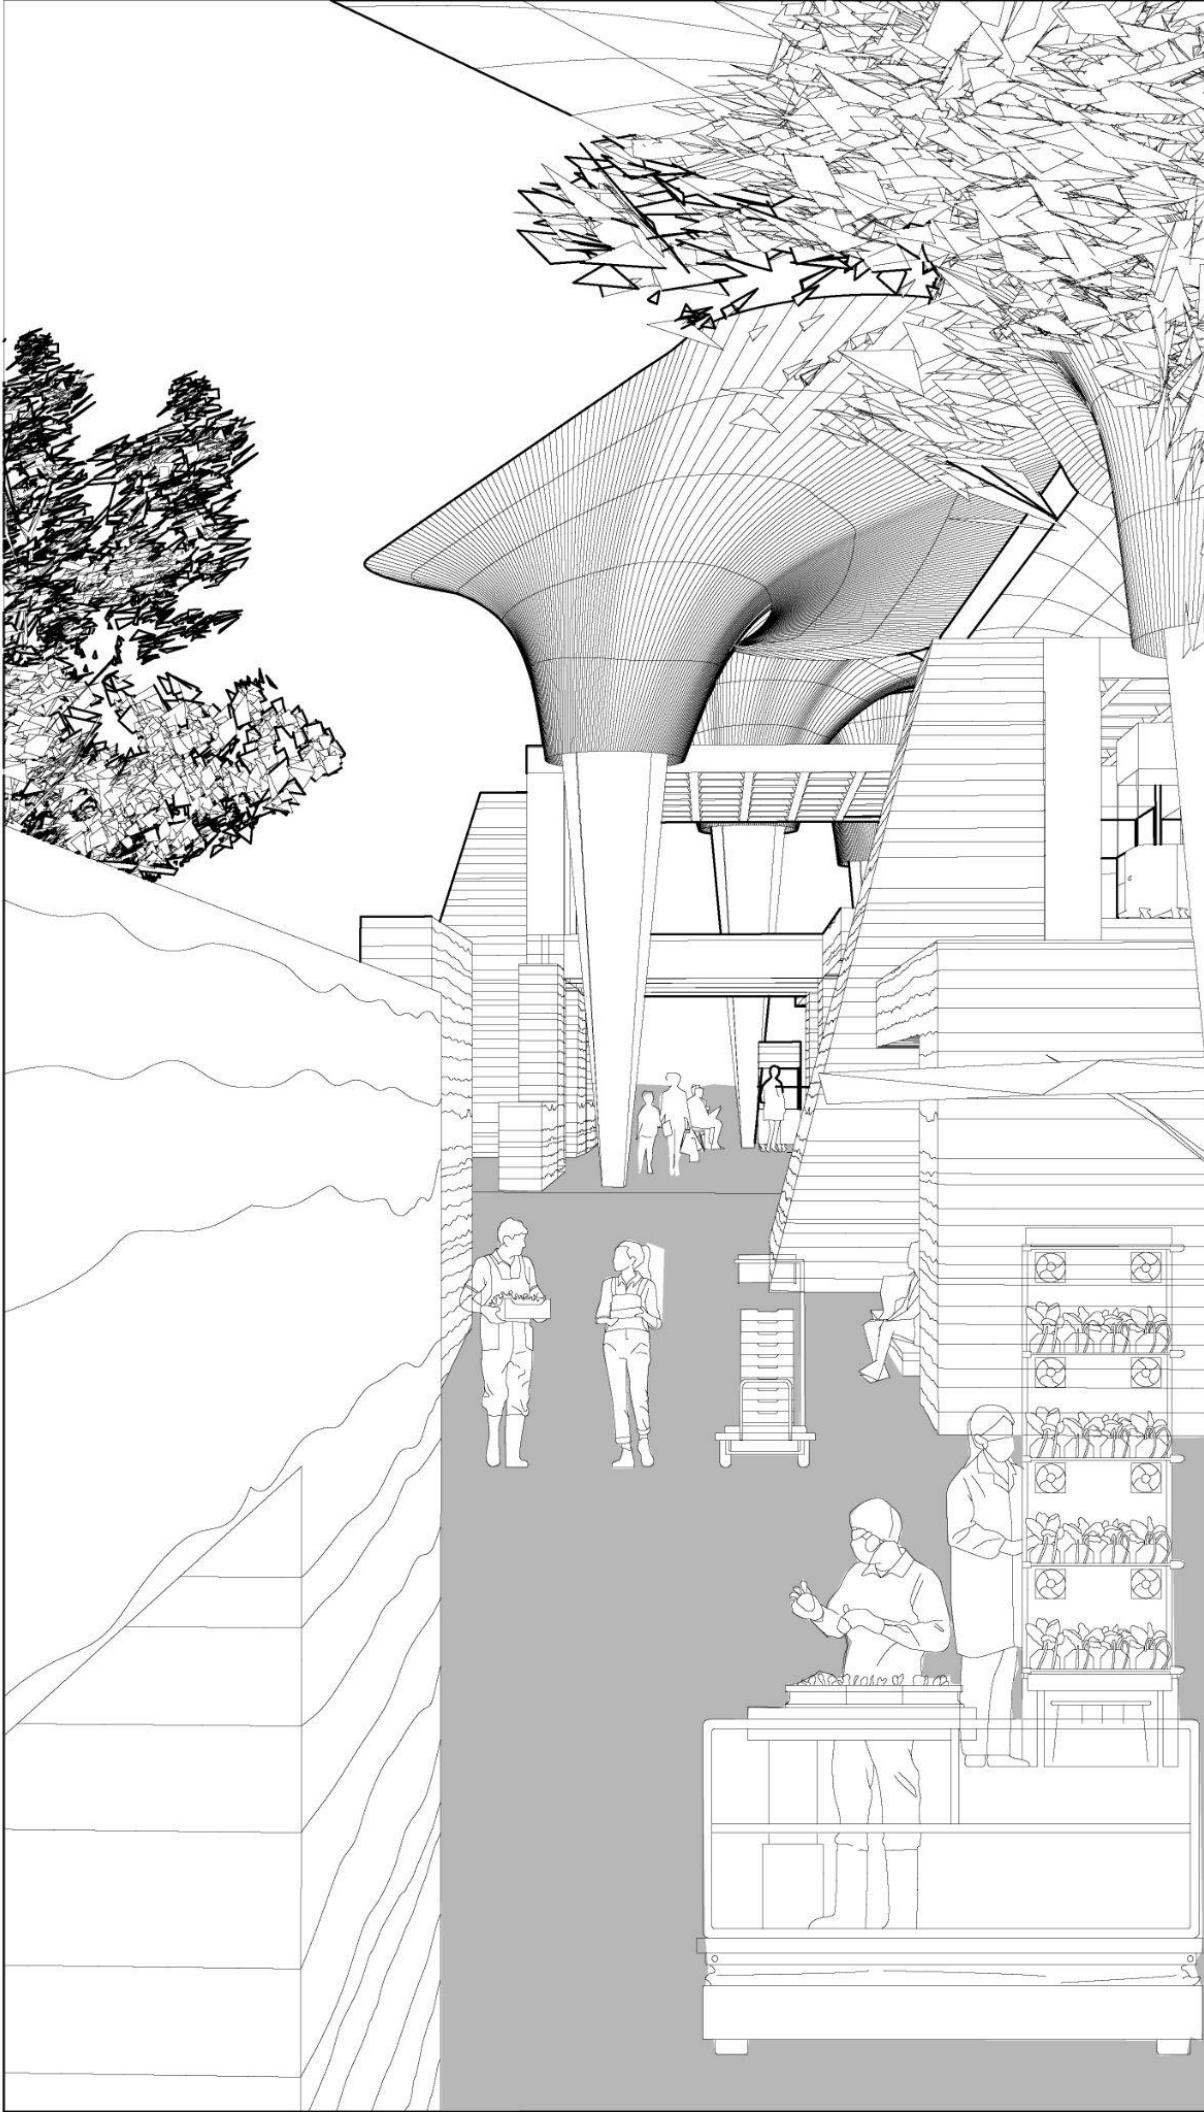

Materiality

Wall: Rammed Earth

Canopy: Bamboo weave with Membrane

Short Elevation looking West

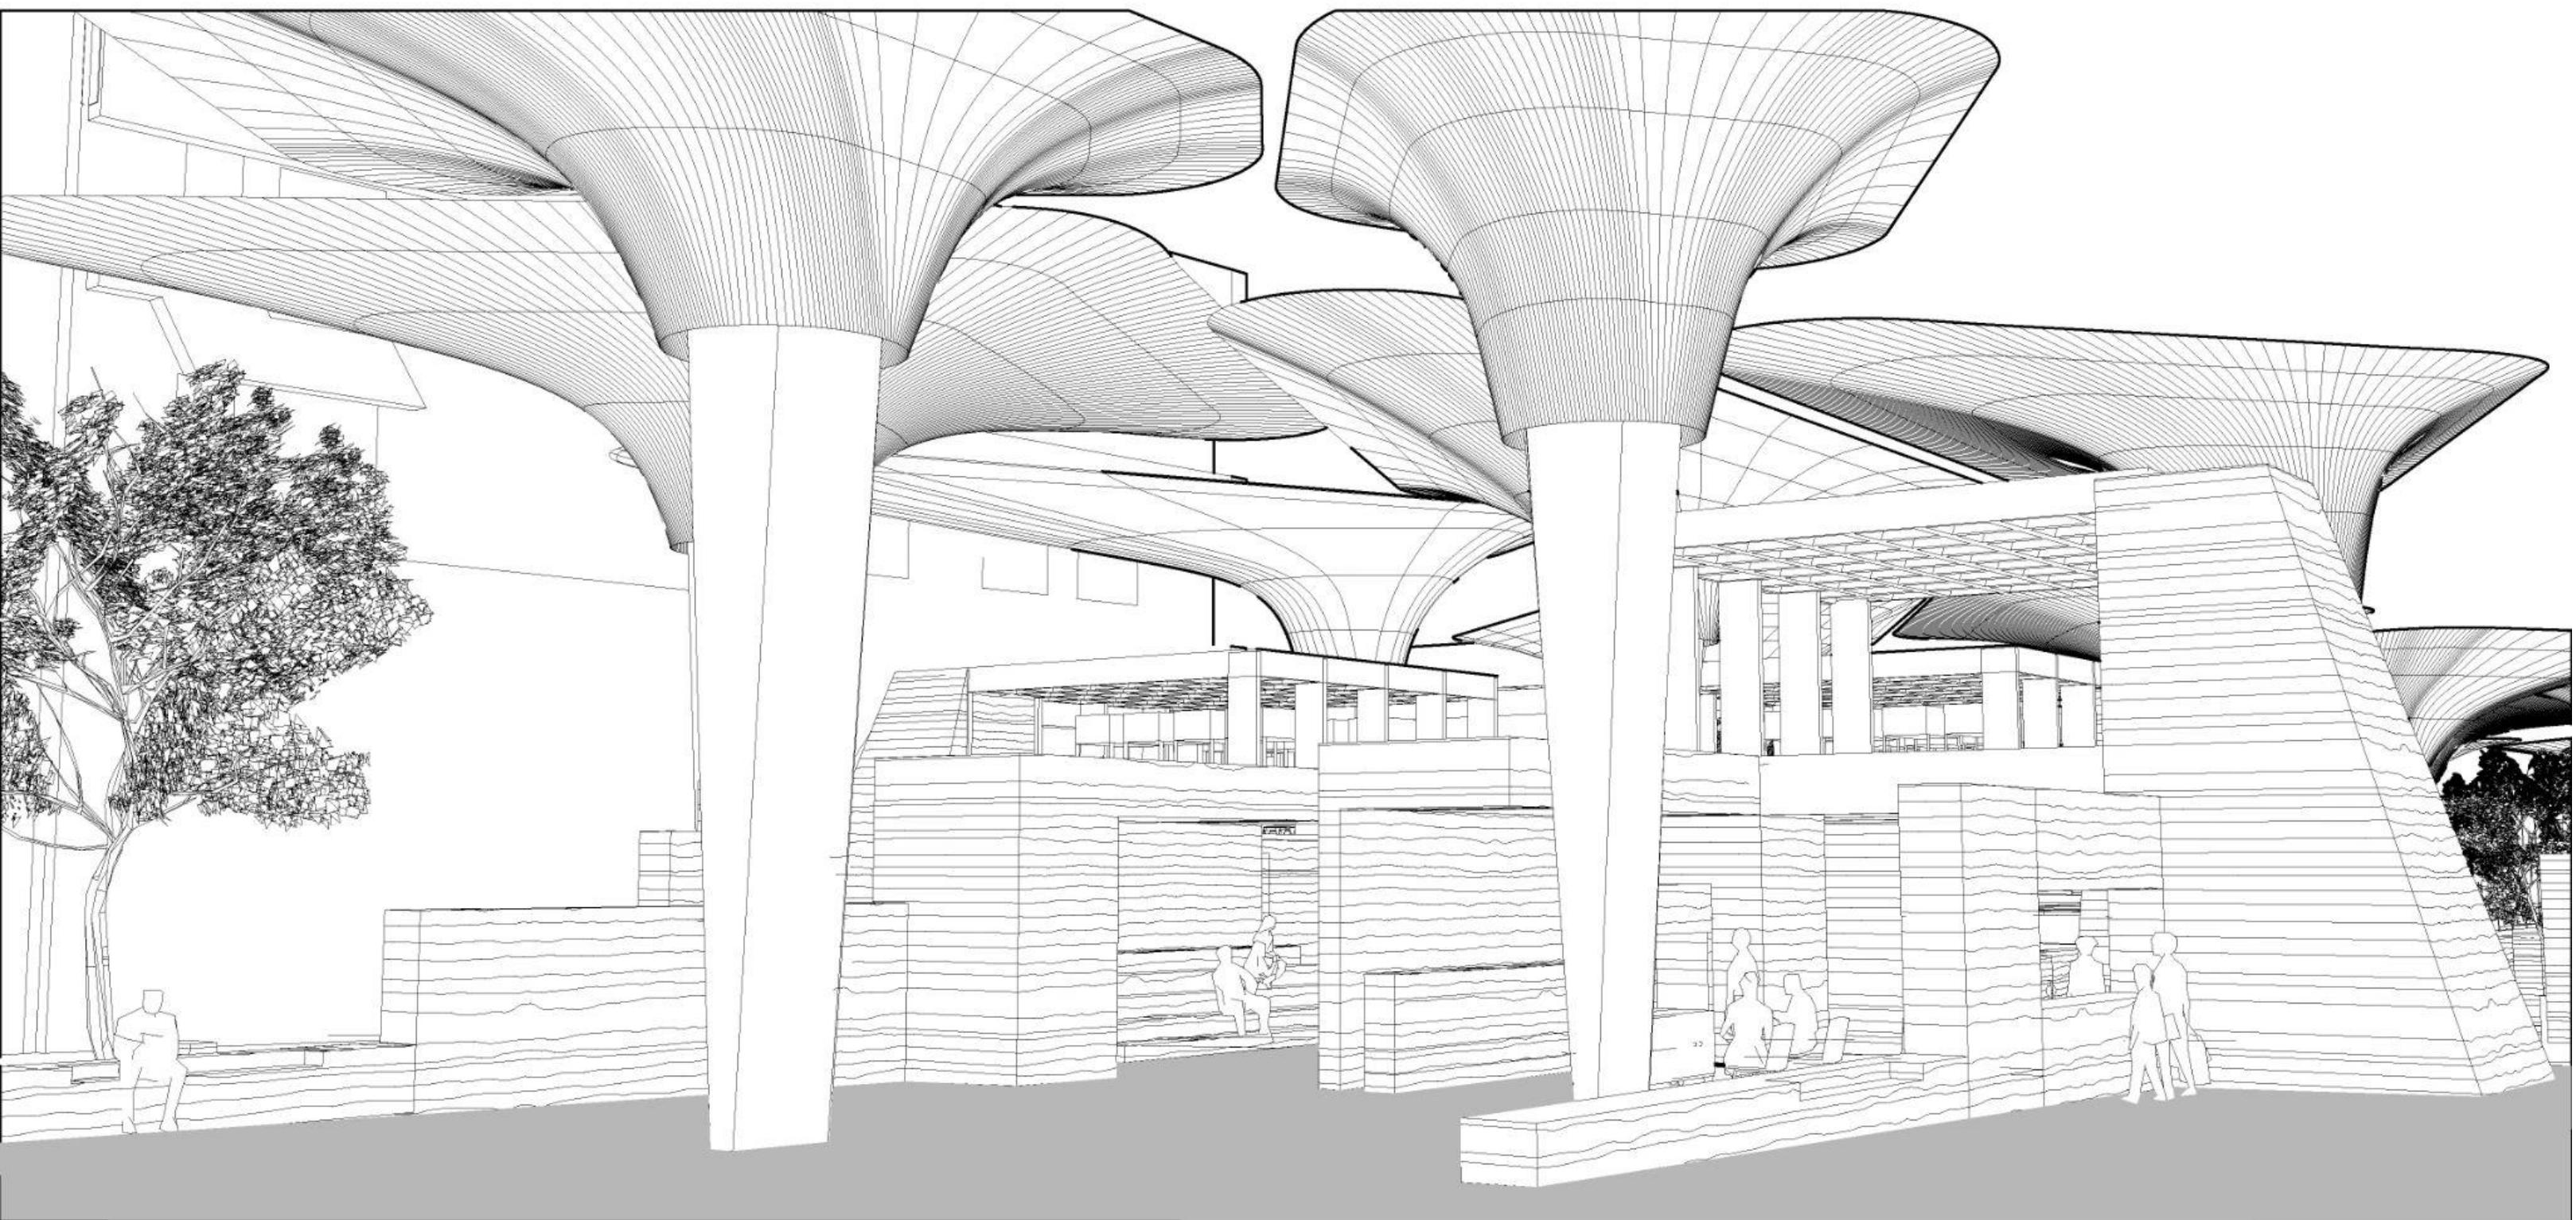

Long Elevation looking North (Sanskrit Kendra as background)

Perspective of the bridge (From the pinwheel aperture of SK looking towards NID)

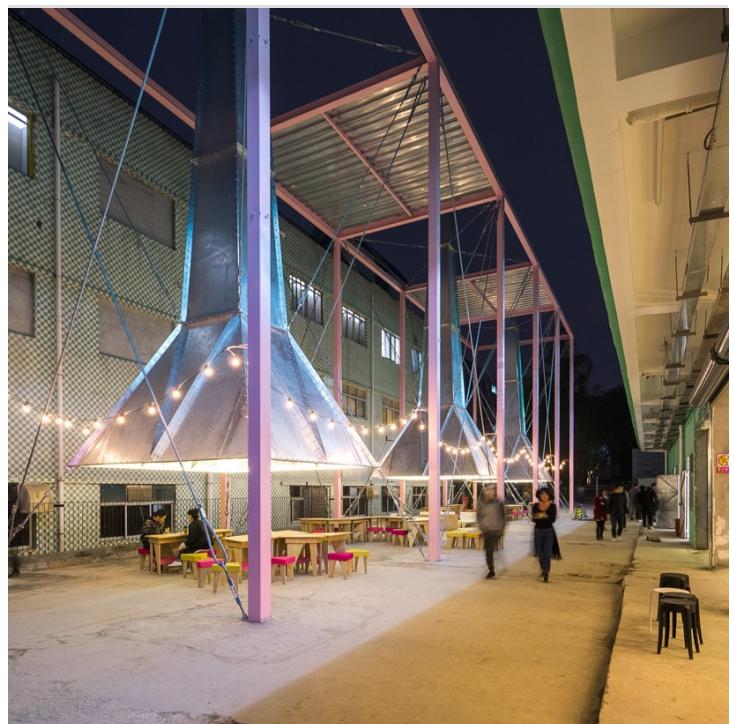

Perspective of the rammed earth and water collection roof and pillar.

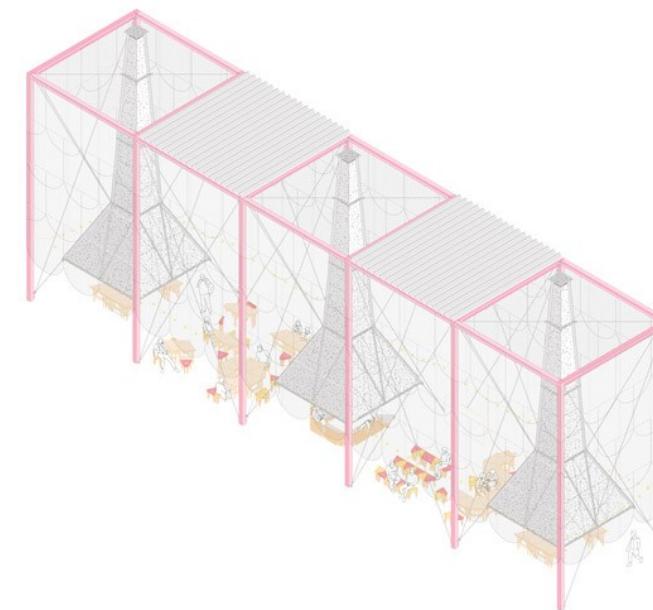

Placemaking: Bicycle projects / Fire Foodies : Atelier Bow-wow

The fire foodies club encourages shared cooking and eating in a bid to encourage a community network whilst drawing attention to the effects of industrialisation in the area.

The customized Furnicycle types—"chair-cycle," "bed-cycle," and "table-cycle"—result from simple deformations of the standard bicycle form, and can be used independently for driving through the city. When brought together, they back up to one another, forming a lively, lounge-like ensemble to accommodate several people.

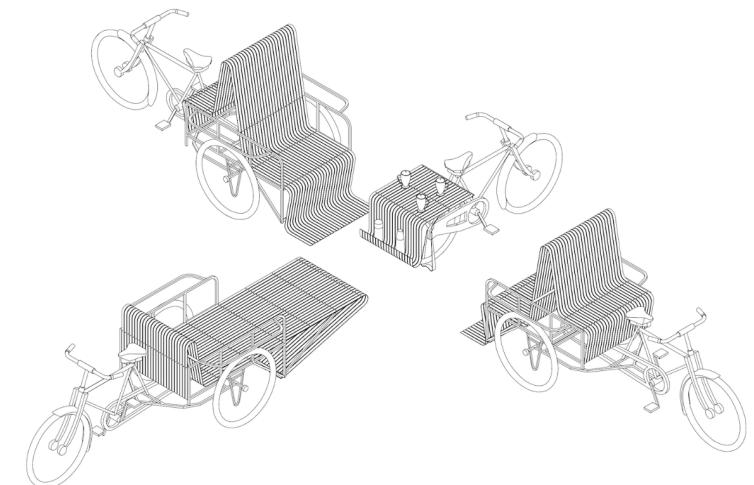

Social space at night.

A armature hosting chimney installations suggests gathering and dining conditions.

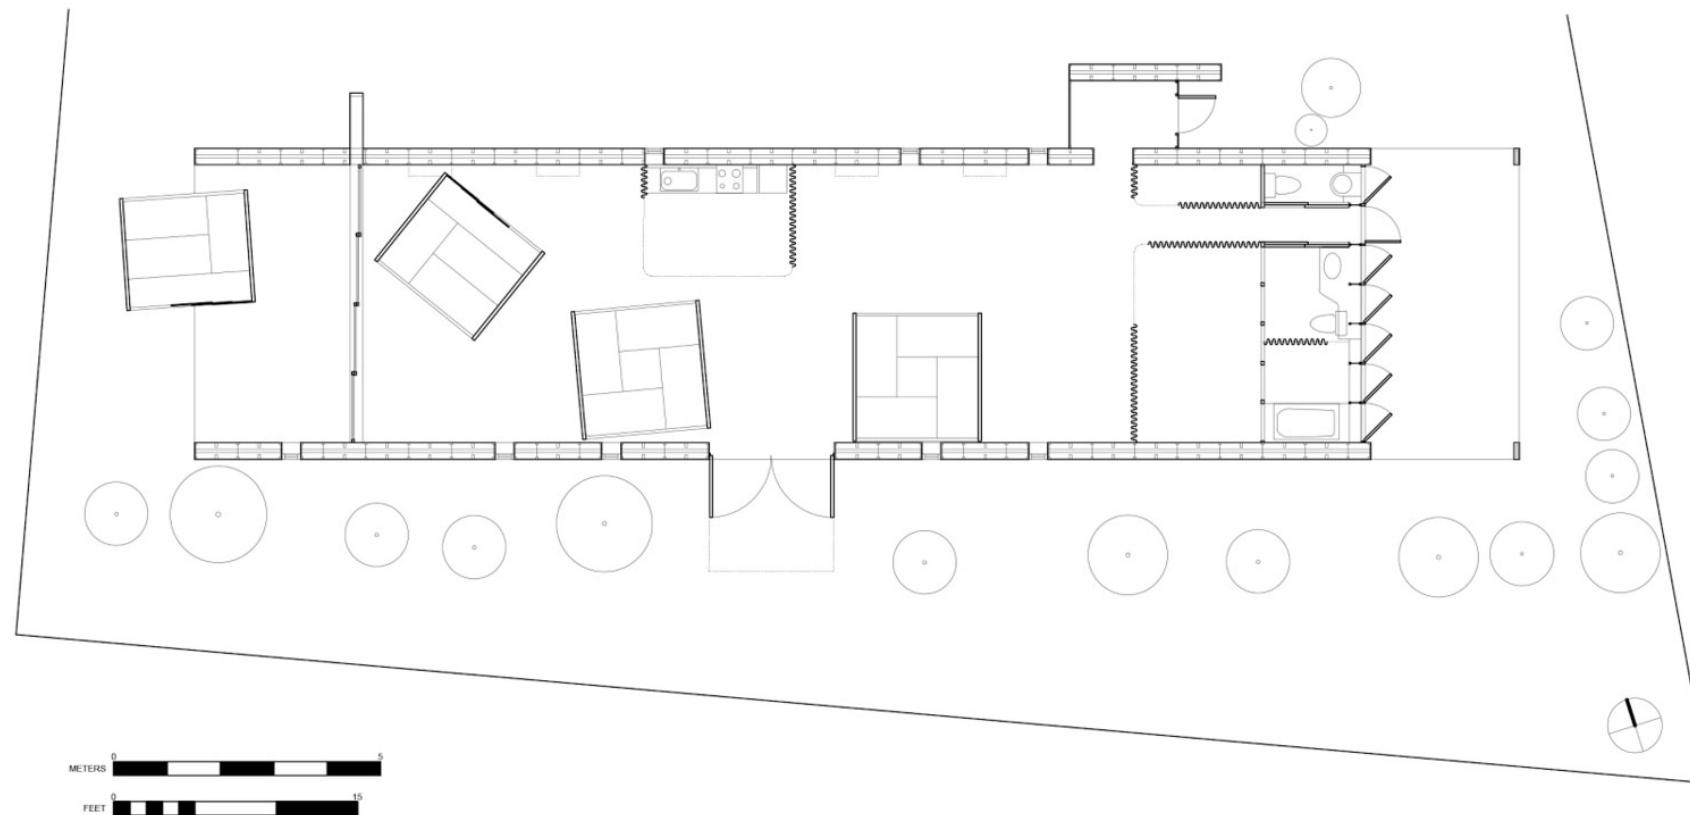

A typical tea drinking setup in Shanghai.

A combination of units makes a scene of interaction between people.

Modularity in flexible space settings: The Naked House: Shigeru Ban Architects

Lobby. Preexisting wall exposed.

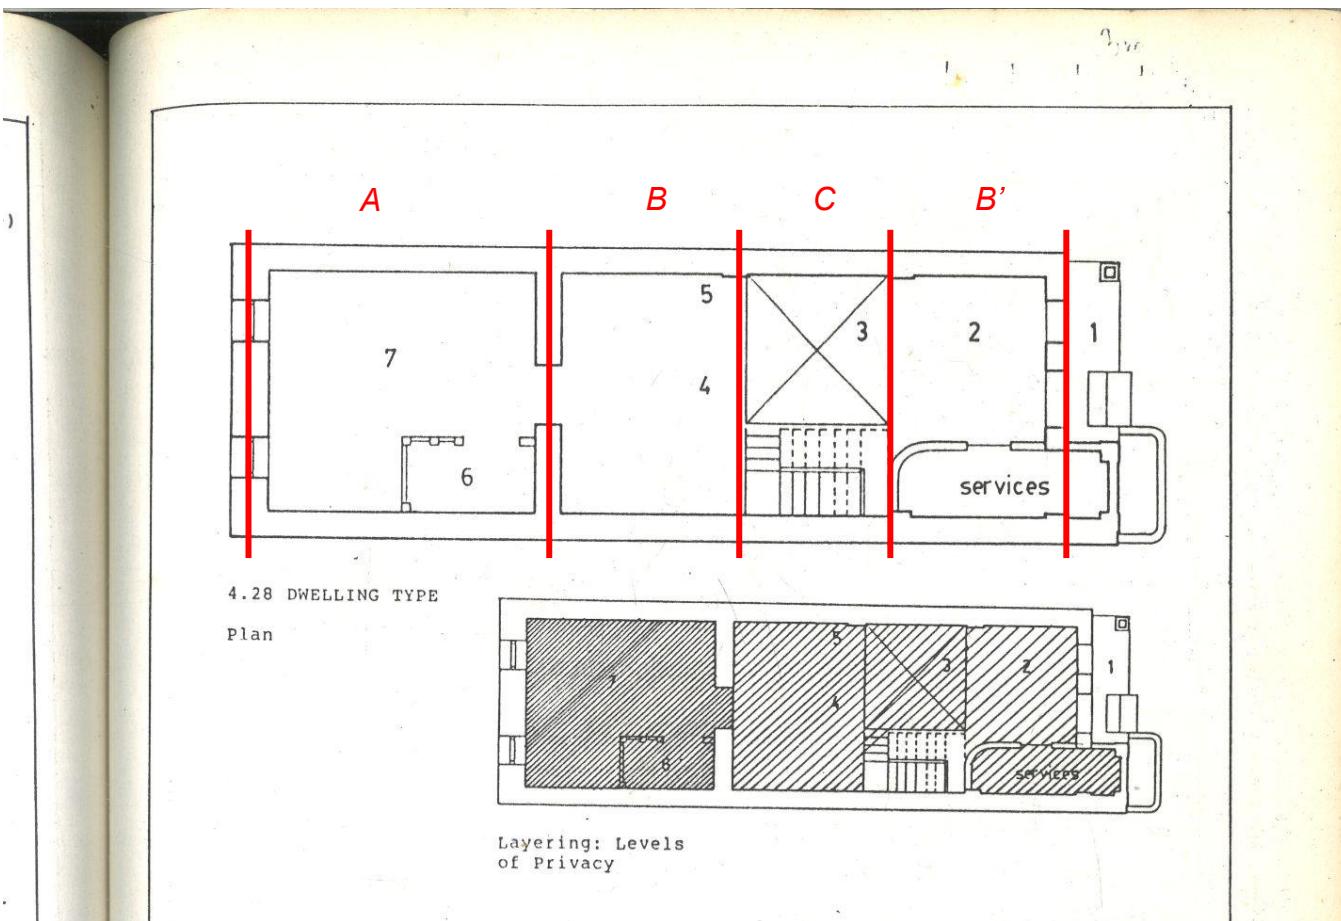

Insertion of new structure/moving planes/
furniture contrast with the shell.

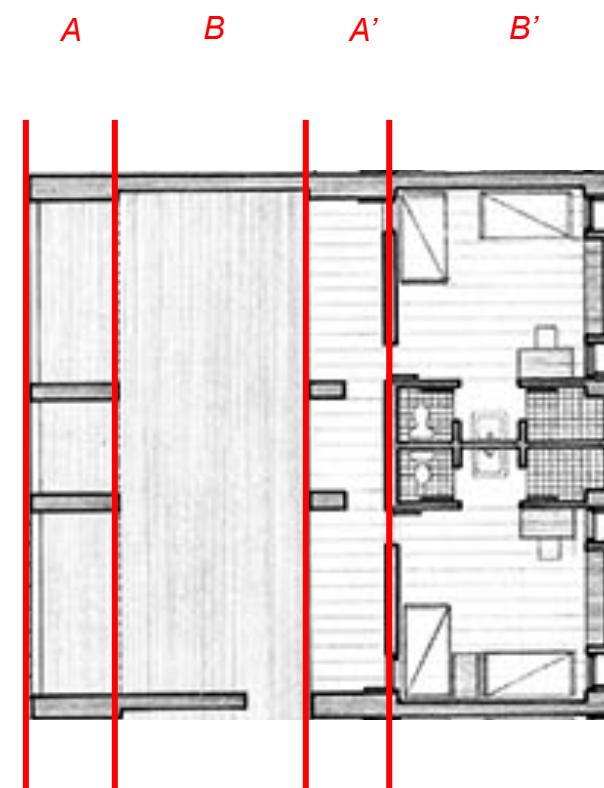

Corten plates and wood blends in tune.

Insertion and clear levels of change between
the old and new.

Triggers: Module/Datum of loose program

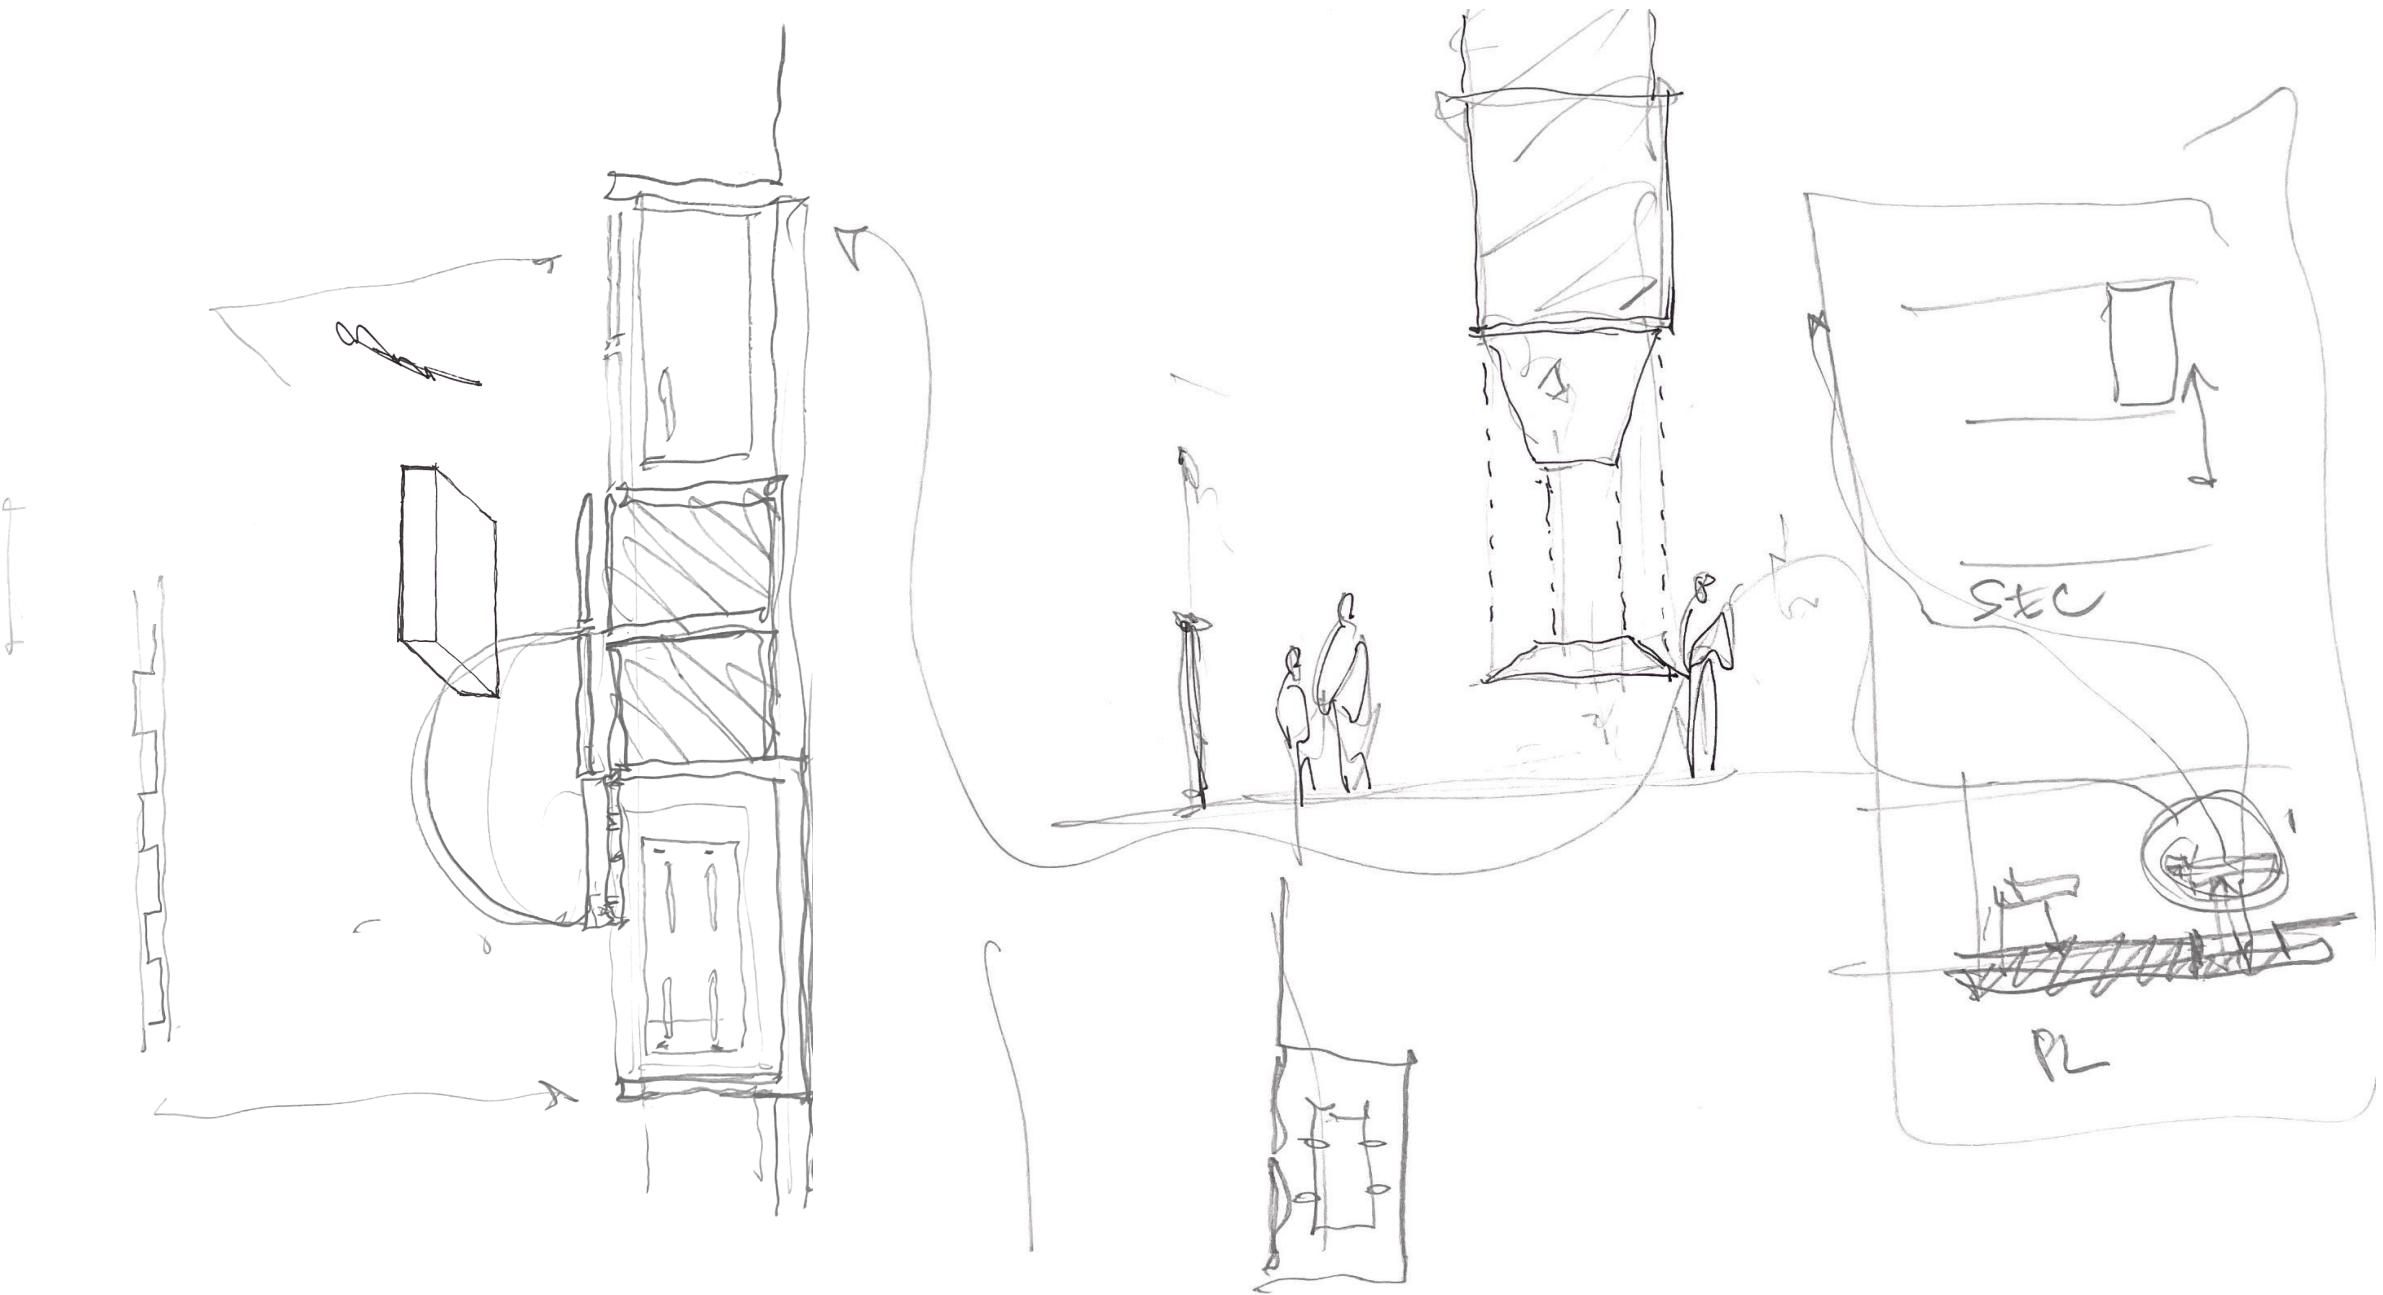

Pol House units

Spatial arrangement of ATIRA House's Unit, level of privacy, in-between space between inside and outside, programmed and unprogrammed space

Module Variations

Ground Floor Space organization study

Moving Plane/ elevator that can transfer cargo/ storage/ people from ground condition to space above.

Ground Floor Porosity: Sarabhai House(1955): Le Corbusier

The country is tropical. The monsoon rages for two months of the year and is an alternating combination of downpours and sunshine. A western architect has spent his life learning his profession; to be sure he must apply his profession in India, but he must adapt it to antagonistic requirements: comfort is coolness, it is the current of air, it is the shade.

View from the private garden

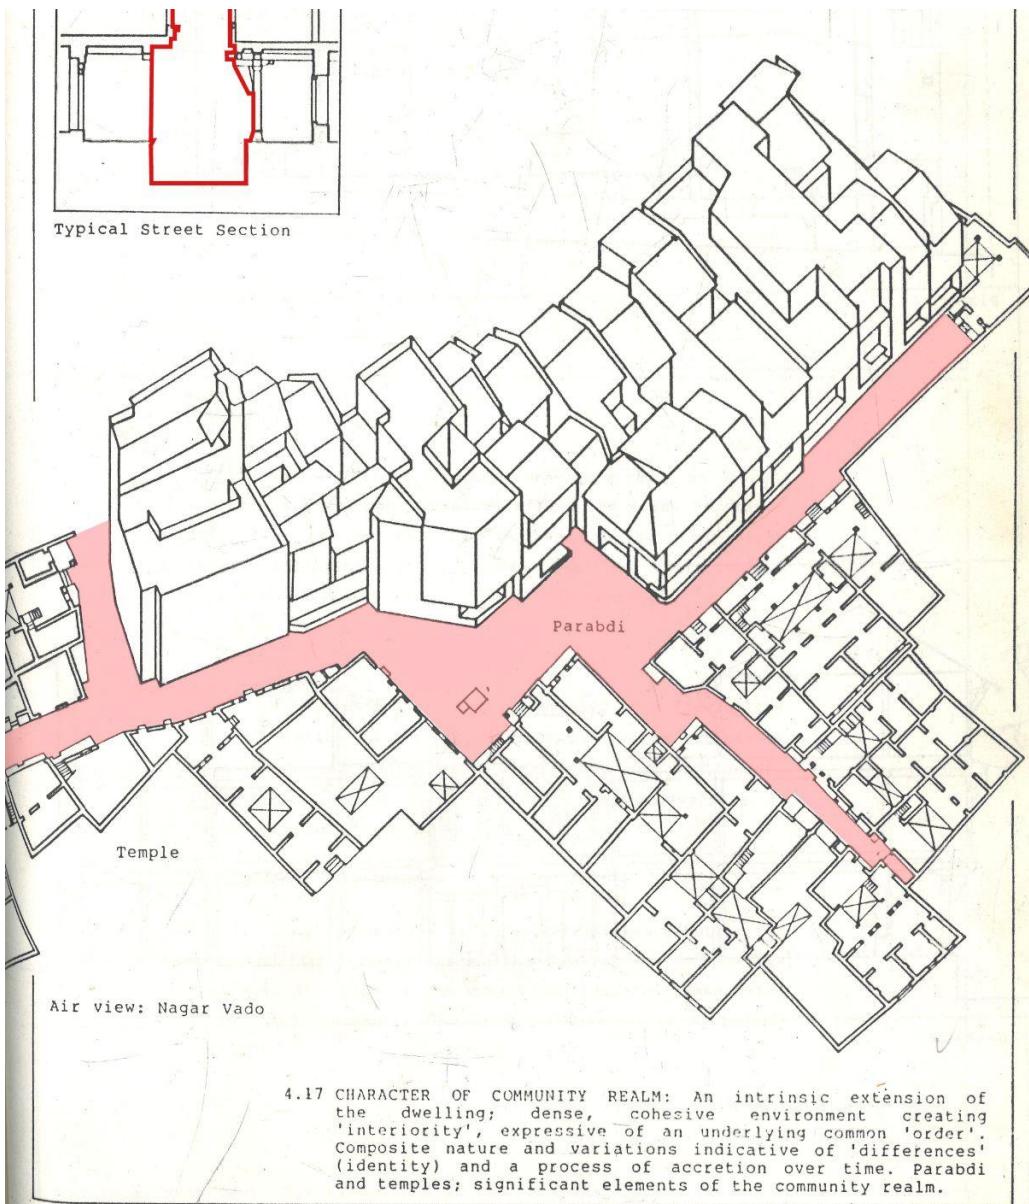

Water management infrastructure

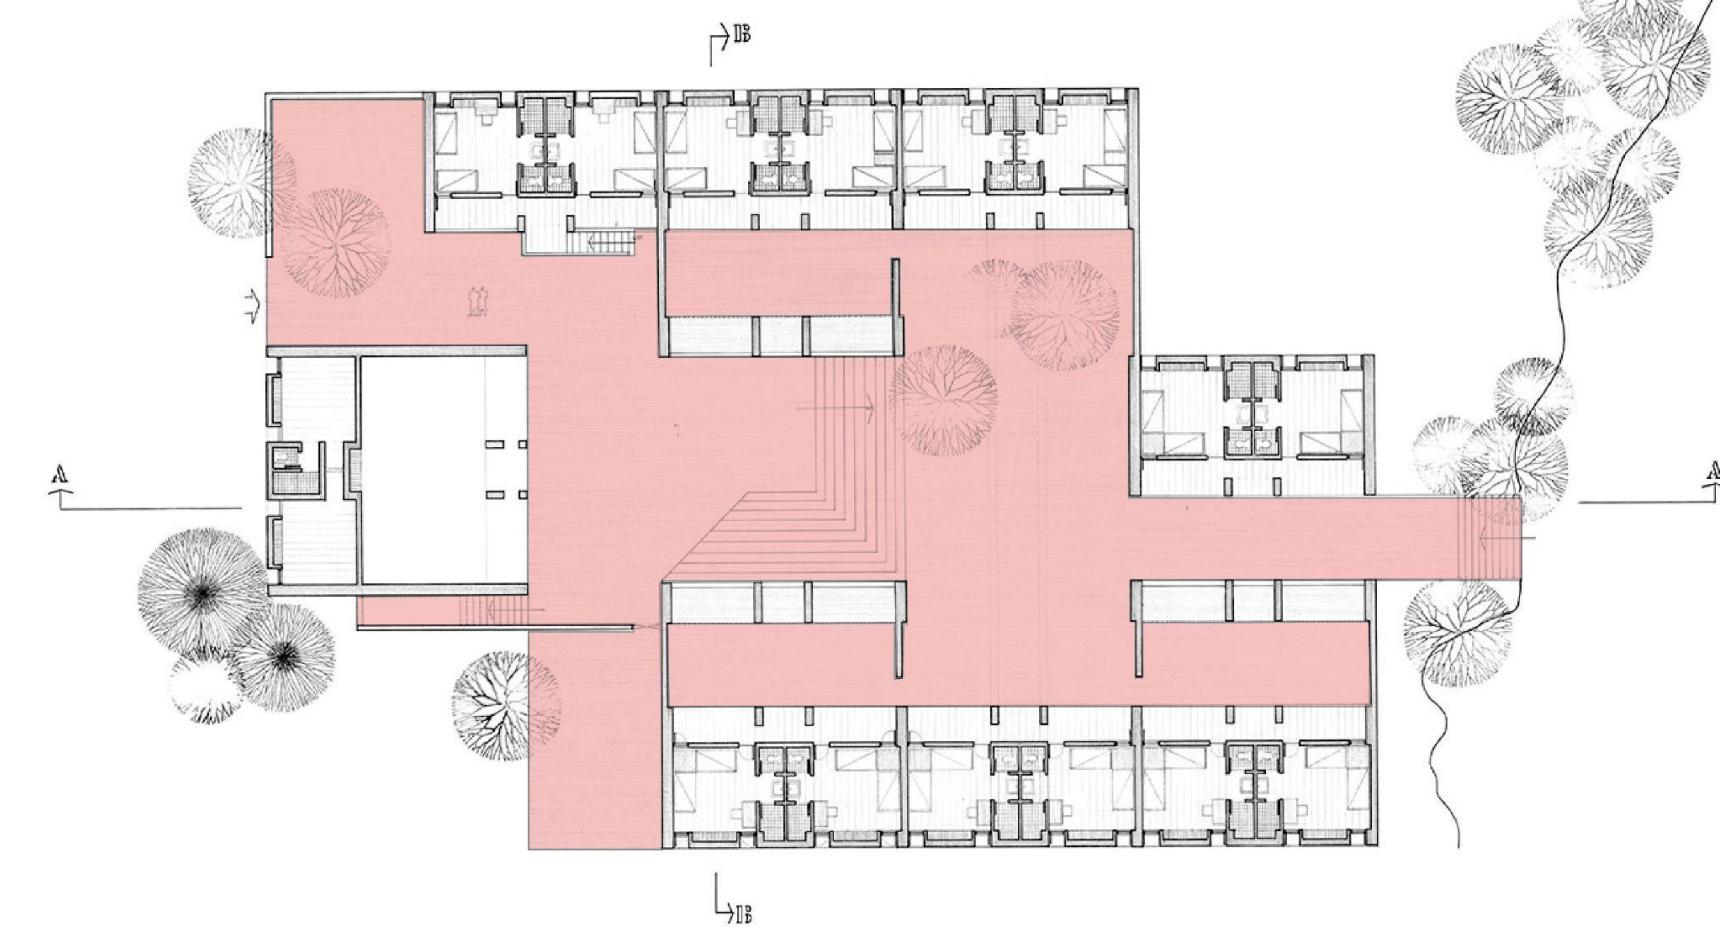

Open plan porosity ground floor

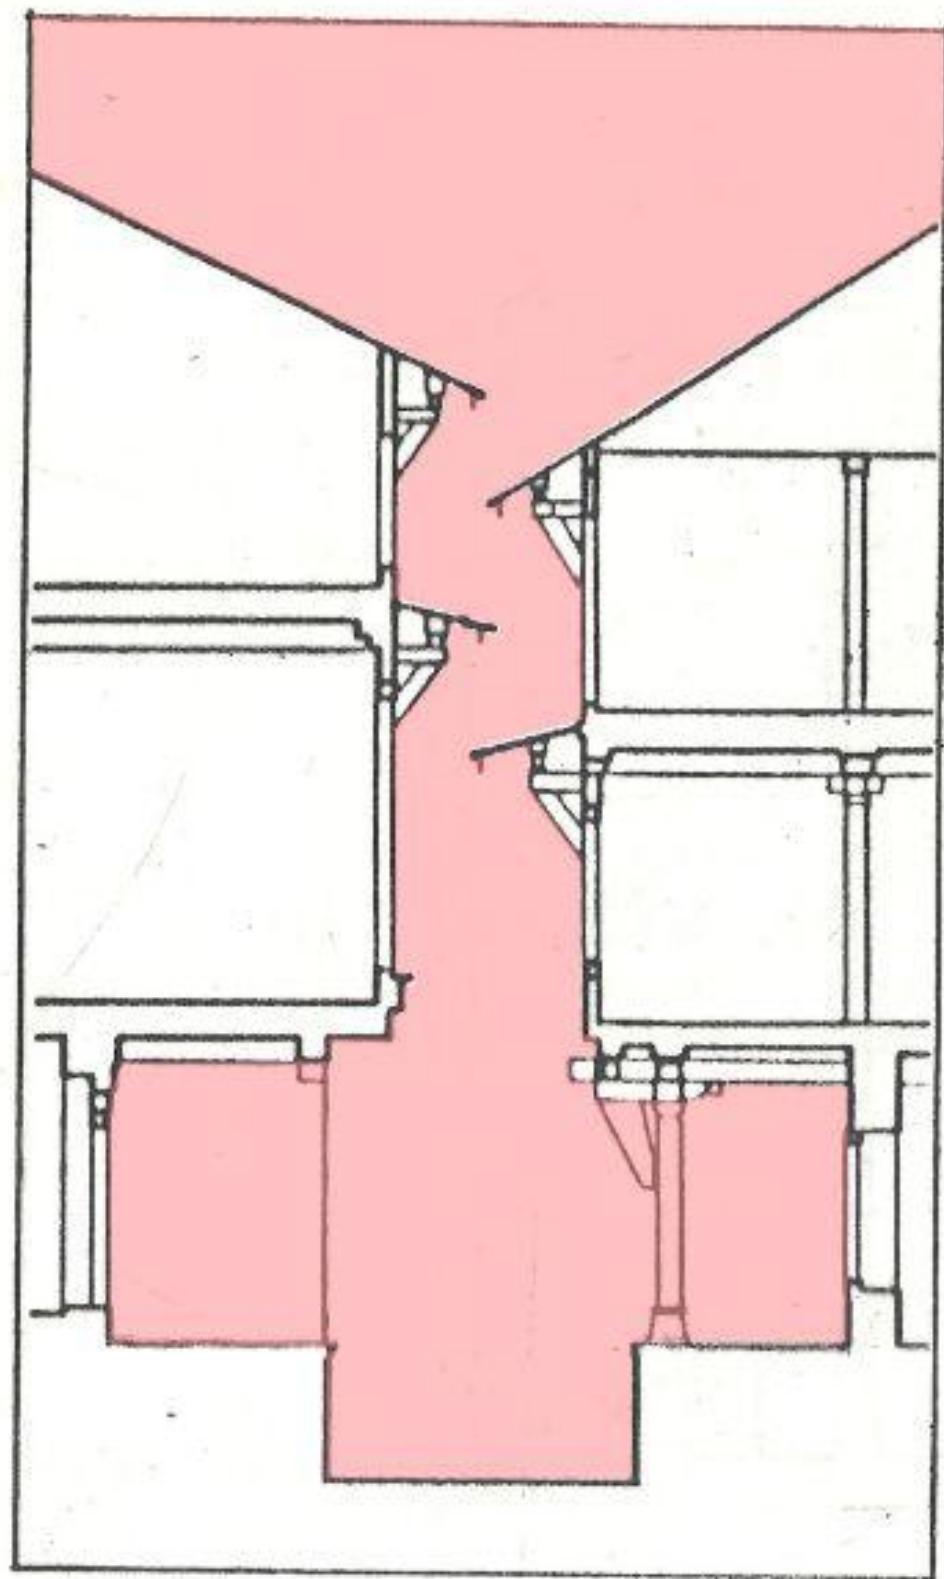

Triggers: Porosity and Connection to the Community

Pol House community space characterized by distancing and shading between building units

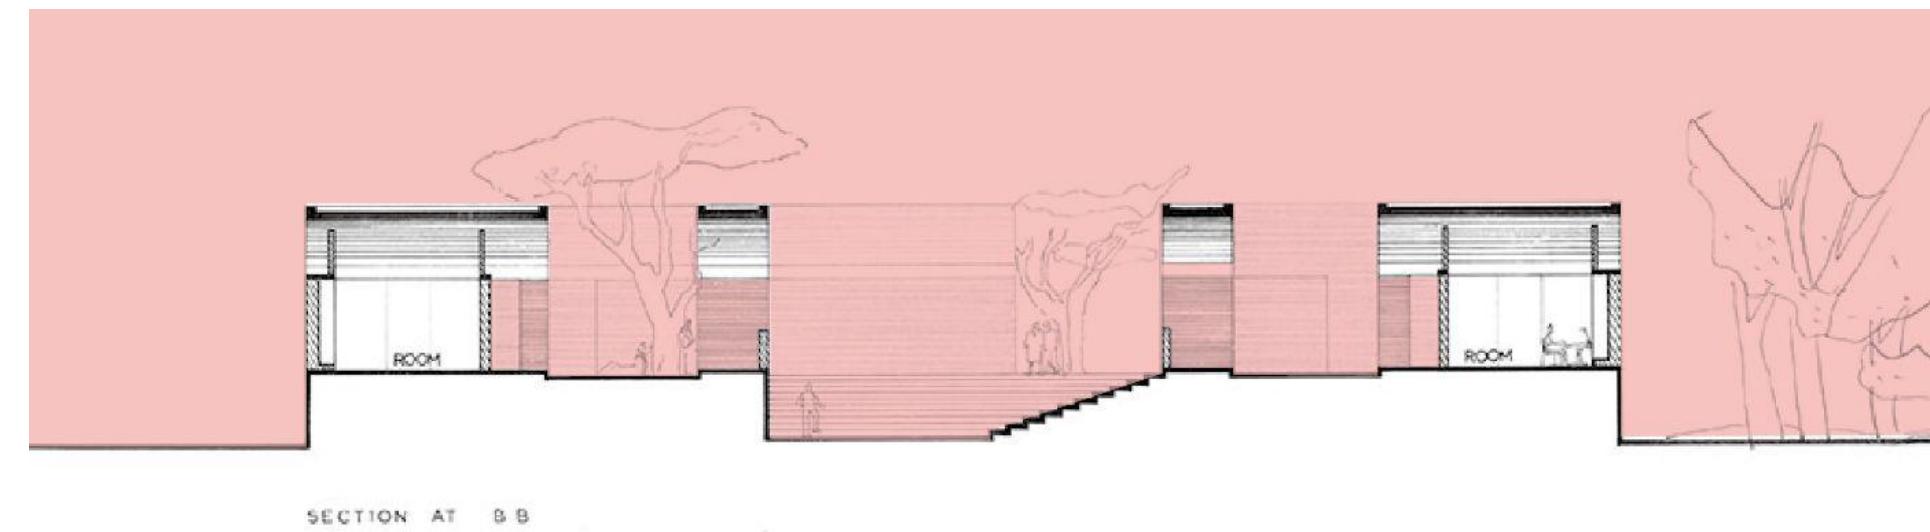

Plan: Units to create open community space with shading

Typical Street Section

*Sunken area of the community space to gain more shade and cooling effects
Porosity on the ground floor level, blurring the inside and outside*

*Section: Units to create open community space with shading
Modern manifestation of Pol House community building*
